(AUTONOMOUS)
2021-2022

**G. S. COLLEGE OF COMMERCE & ECONOMICS, NAGPUR
(AUTONOMOUS)**

CERTIFICATE

(2021 - 2022)

This is to certify that Mr. /Miss Amey A. Pimplapure & Charu A. Nagtode has completed their project on the topic of SportiShopify Website prescribed by G. S. College of Commerce & Economics, Nagpur (Autonomous) for B.Com. (Computer Application) – Semester-VI.

Date:

Pravin Yadao.

Place: Nagpur

Project Guide

Internal Examiner

ACKNOWLEDGEMENT

We take this opportunity to express our deep gratitude and whole hearted thanks to project guide Prof. Pravin Yadao, Coordinator for his guidance throughout this work. We are very much thankful to him for his constant encouragement, support and kindness.

We are also grateful to our teachers Prof. Rahul Tiwari, Prof. Sushma Gawande, Prof.Preeti Rangari, Prof. Prajka Deshpande and Prof. Haresh Naringe for their encouragement, help and support from time to time.

We also wish to express our sincere thanks to Principal Dr. N. Y. Khandait for providing us wide range of opportunities, facilities and inspiration to gather professional knowledge and material without which this project could not have been completed.

Amey A.Pimplapure

Charu A.Nagtode

Date:

Place: Nagpur

DECLARATION

We **Amey A. Pimplapure & Charu A. Nagtode** hereby honestly declare that the work entitled "**Sportishopify Website**" submitted by us at G. S. College of Commerce & Economics, Nagpur (Autonomous) in partial fulfillment of requirement for the award of B.Com. (Computer Application) degree by Rashtrasant Tukadoji Maharaj, Nagpur University, Nagpur has not been submitted elsewhere for the award of any degree, during the academic session 2021-2022.

The project has been developed and completed by us independently under the supervision of the subject teacher and project guide.

Amey A.Pimplapure

Charu A.Nagtode

INTRODUCTION

Introduction

Our Project title is “Sports brand Website” This project is based on creating a ecommerce Website regarding to the sports where people can buy the product regarding to the sports and can easily return it to the seller. As we all know today almost every person in the world is using smartphone and everyone is very much friendly with the internet and they find it easy to handle things on internet in very easy manner so due to this the people will be very friendly to handle this type of website where they can buy the things related to the sports.

This website will help people in buying all the things related to sports on single platform from here only they can buy the things related to the sports at one click so that they did not need to go lookout for one thing in whole market. The buying activity becomes much easier as they can see varieties here as compared to traditional shops where people will get limited options.

Our website is designed in such a way that anyone can handle it easy and can purchase things from it very easily and can also use it from anywhere .in our website there is one advantage that anyone can see the sports items and there is also no need to login but for purchasing anything the person has to login to the website which includes details like username, password, and email id. This is created that so that the user will be able to know the items that are in the shopping cart this makes the buying process very easier.

OBJECTIVES

Objectives

- To Create User-friendly Website to sports lover :- This website is so user-friendly that user can access it on mobile, tablet pc laptop and also desktop.
- To make available information related to sports to sports lover :- User can get information related to the sports by using our website they get clear view of sports related equipment this help them to get sports equipment quickly.
- To create easy and convenient website :- Our objective was creating a website which will be very convenient and will be very easily to handle so that it will benefit the user .
- Providing good facilities :- Providing quality and good content on our website and also updating it regularly can help user to use it very easily and they can purchase things very easily.
- To making buying and selling activities easier :- Our Website has made buying and selling activities easier as these Website gives best shopping experience to the user as they the website's shopping activities is easier.

Preliminary System Analysis

Preliminary System Analysis

Preliminary Investigation basically refers to the collection of information that guides the management of an organization to evaluate the merits and demerits of the project made and make an informed judgment about the feasibility of the proposed system. System Analysis is not only time consuming but also a rogations task. But it is crucial and most important phase for software developing process. Preliminary investigation is the process of gathering data for requirement analysis it is more helpful for problem definition and requirement specification.

1] Preliminary Investigation:

Preliminary Investigation basically refers to the collection of information that guides the management of an organization to evaluate the merits and demerits of the project request and make an informed judgment about the feasibility of the proposed system. This sort of investigation provides us with a through picture of the kind of software and hardware requirements which are most feasible for the system, plus the environment in which the entire project has to be installed and made operational so that it should be good for the users and fulfill the requirements for which it was made. The preliminary-investigation phase sets the stage for gathering information about the current problem and the existing information system. This information is then used in studying the feasibility of possible information systems solutions.

2] Present system in use:

The present system in use is provided with lots of services and facilities .The system can be maintained as per users requirements and changes or updates can be made time to time as per the need. Sometimes it becomes to difficult for the user to handle the shopping related activities. As present system is outdated so user wants only updated version it

provides boring and less attractive images for the shopping related things and things available are so not according to the trend visitors cannot accept such things so the efforts they need good quality picture and also they need things according to the trend which is not possible in current website so these flaws in cuurent system need to be corrected so there is need for the updated website to fulfill the current need of customers.

3] Flaws in present system:

As looking to the present system due to outdated version flaws is occurred in present system .

- Lack of security: lack of security is one of the biggest problem that can make website unsecure to the user so if the website security is completely maintained so it helps user to access the website.
- Poor or outdated website design: As in present system the website is very outdated so due to this the user don't find the website interesting.
- Images that lack of quality: As website is outdated so low resolution images are available which are unacceptable by users.
- Slow loading Time: Due to outdated version it takes very time to load the website so it makes the visitor experience bad for the website.

4] Needs of new system:

This website is designed in such ways which help in overcome all the flaws which is in current system .The present system is not completely outdated and but the security is also not provided by current system so there will be need of new system which can cover the flaws and security concern of user that are not provided in current system.

- **Techniques and coding :-**

If website is developed several year ago it probably has a lot of unnecessary html code may slowing down website speed so modern techniques such as CSS will web pages to all devices.

- **Content:-**

The first impression of our website will be over all layout but reader is visiting our website because they looking for useful updated information also user should feel the website so creative and also user friendly.

- **Mobile friendly:-**

The website is mobile friendly as users spending more hours online on there smartphone.

- **Responsive:-**

It's a technique that allows a website to flex and adapt to the size of screen. It's being viewed on.

- **Measuring Effectiveness:-**

It will be able to measure the effectiveness of website An old system may not be equipped with necessary tool that will help us measure how effective our online presence.

- **Website speed :-**

website loading time is a major factor so due to modern techniques the loading time will be get faster.

5] Feasibility study:

This is the stage where the feasibility is being studied by the developer for the project. The feasibility study is useful to evaluate the cost and benefit of the new system requested. The feasibility study tries to anticipate future scenarios of the software

development. It evaluates the benefits of the new system. The aim of the feasibility study is to see whether it is possible to develop a system at a reasonable cost. At the end of the feasibility study a decision is taken whether to proceed or not. Feasibility study is to determine various solutions of the problem and then picking up one of the best solution. It is measure of how beneficial the development of information system will be to an organization.

The feasibility study has the following objectives:-

- Defines the problem clearly.
- Effective use of resources.
- Analyze the cost and benefit.

➤ Technical Feasibility –

Technical feasibility concentrates on the technical aspects of the project. This has been conducted regarding the requirement of different hardware and software. This project is technically feasible. This project does not require any special hardware and can run simply on internet explorer.

➤ Operational Feasibility –

In Operational Feasibility degree of providing service to requirements is analyzed along with how much easy product will be to operate and maintenance after deployment. While making any project it is necessary to study the operational features in provides user friendly feature so that any new user can handle it easily. Decides the platform used so user friendly that any user can understand it's operational. The easy accessing and user-friendly techniques make this project operationally feasible.

➤ Economic Feasibility –

In Economic Feasibility study cost and benefit of the project is analyzed. Means under this feasibility study a detail analysis is carried out what will be cost of the project for development which includes all required cost for final development like hardware and software resource required, design and development cost and operational cost and so on. After that it is analyzed whether project will be beneficial in terms of finance for organization or not. The hardware and software requirements of this projects are less expenses and easily available. Thus the cost factor is cheaper. Thus is investment needed to implement the project so as these factors are cheaper dues to this our project is completely economical to everyone as it has incurred less expenses.

➤ Social feasibility –

Social feasibility is to determine whether the project will be acceptable to people or not whether that project will be help people or not or whether people will be able to handle the project. This determination typically examine the probability of the project accepted by the group directly affected by the proposed system change. It describe the effect on users from the introduction of the new system considering whether there will be need for retraining the workforce or not.

6] Project Category:

In these project “sports brand website” we have used HTML at front end and used CSS for styling of website MySQL for adding database and has use PHP to add database and contents to the website.

HTML:

HTML stands for Hypertext Markup Language. It is used to design web pages using a markup language. HTML is the combination of Hypertext and Markup language. Hypertext defines the link between the web pages. A markup language is used to define the text document within tag which defines the structure of web pages. This language is used to annotate (make notes for the computer) text so that a machine can understand it and manipulate text accordingly. Most markup languages (e.g. HTML) are human readable. The language uses tags to define what manipulation has to be done on the text. HTML is a markup language used by the browser to manipulate text, images, and other content, in order to display it in the required format.

CSS:

Cascading Style Sheets, fondly referred to as CSS, is a simply designed language intended to simplify the process of making web pages presentable. CSS allows you to apply styles to web pages. More importantly, CSS enables you to do this independent of the HTML that makes up each web page. CSS is easy to learn and understood, but it provides powerful control over the presentation of an HTML document. CSS (Cascading Style Sheets) is used to style and layout web pages — for example, to alter the font, color, size, and spacing of your content, split it into multiple columns, or add animations and other decorative features. This module provides a gentle beginning to your path towards CSS mastery with the basics of how it works, what the syntax looks like, and how you can start using it to add styling to HTML.

PHP:

The **PHP Hypertext Preprocessor (PHP)** is a programming language that allows web developers to create dynamic content that interacts with databases. PHP is basically used for developing web based software applications.

USES:-

- PHP can generate dynamic page content
- PHP can create, open, read, write, delete, and close files on the server
- PHP can collect form data
- PHP can send and receive cookies
- PHP can add, delete, modify data in your database
- PHP can be used to control user-access
- PHP can encrypt data

Features Of PHP:-

• Performance:

PHP script is executed much faster than those scripts which are written in other languages such as JSP and ASP. PHP uses its own memory, so the server workload and loading time is automatically reduced, which results in faster processing speed and better performance.

• Open Source:

PHP source code and software are freely available on the web. You can develop all the versions of PHP according to your requirement without paying any cost. All its components are free to download and use.

- **Familiarity with syntax:**

PHP has easily understandable syntax. Programmers are comfortable coding with it.

- **Embedded:**

PHP code can be easily embedded within HTML tags and script.

- **Platform Independent:**

PHP is available for WINDOWS, MAC, LINUX & UNIX operating system. A PHP application developed in one OS can be easily executed in other OS also.

- **Database Support:**

PHP supports all the leading databases such as MySQL, SQLite, ODBC, etc.

- **Error Reporting:**

PHP has predefined error reporting constants to generate an error notice or warning at runtime. E.g., E_ERROR, E_WARNING, E_STRICT, E_PARSE.

- **Loosely Typed Language:**

PHP allows us to use a variable without declaring its datatype. It will be taken automatically at the time of execution based on the type of data it contains on its value.

- **Web servers Support:**

PHP is compatible with almost all local servers used today like Apache, Netscape, Microsoft IIS, etc.

- **Security:**

PHP is a secure language to develop the website. It consists of multiple layers of security to prevent threads and malicious attacks.

- **Control:**

Different programming languages require long script or code, whereas PHP can do the same work in a few lines of code. It has maximum control over the websites like you can make changes easily whenever you want.

Software Hardware Specifications

Hardware and Software Specifications

Every application needs the software in which it has to be executed and a hardware the application is going to perform its function. Some application cannot run on every platforms and some applications needs some specific requirement in the software or in hardware to get operated. Lets take an example of the applications which cannot be run on every platforms like windows, android, linux, etc. Applications made in visual basic is only supported for the windows, one cannot access this applications from the mobile phones, etc. So, here are some hardware and software specifications which are mandatory for the application to get operated.

HARDWARE :-

Computer hardware includes the physical parts of a Computer, such as the case, central processing unit (CPU), random access memory (RAM), monitor, mouse, keyboard, computer data storage, graphics card, sound card, speakers and motherboard

SOFTWARE :-

Software, in its most general sense, is a set of instructions or programs instructing a computer to do specific tasks. Software is a generic term used to describe computer programs that run on PCs, mobile phones, tablets, or other smart devices. Software is often used to describe all the functional aspects of a computer that do not refer to its physical components (hardware). Scripts, applications, programs and a set of instructions are all terms often used to describe software. Everything that “runs” on a computer, from an operating system, to a diagnostic tool, video game, or app can be defined as software.

Following are the software specifications that is required to develop this project is as follows: -

- Language Used (Front End) – PHP Database Used
- (Back End) – MySql
- Supporting Languages Used – Html (Version 5) Cascading Style Sheet (CSS)
JavaScript (JS)
- Web Browser Used – Chrome Internet Explorer
- Text Editors Used – Sublime Text Editor

Home Page:

Men's Page:

The screenshot shows a web browser window for 'Men | SportShopify' at 'localhost/project/Men.html'. The header includes a logo, navigation links for Men, Women, Kids, New Arrivals, Commodity, and a search bar. On the left, a sidebar lists 'New Arrivals' (Sports wear, Sports shoes) and 'Shop by product' (kabaddi wear, cricket wear, football wear, swim wear). The main content area displays three products: 'Pro Sports Pace Men's Kabaddi Dress' (a man in a red and grey jersey), 'Adult Vintage Baseball Costume' (a man in a white pinstripe baseball uniform), and 'Blue Mens Swimming Costume' (a blue one-piece swimsuit). Each product has a 'Shop Now' button below it. The bottom of the screen shows a taskbar with various icons and system status.

Women's Page:

The screenshot shows a web browser window for 'Women | SportShopify' at 'localhost/project/Women.html'. The layout is similar to the men's page, with a sidebar for 'New Arrivals' (Sports wear, Sports shoes) and 'Shop by product' (badminton wear, swim wear, kabaddi wear). The main content area displays three products: 'Yonex 1520-31 Polyester Badminton Shorts' (a woman in a dark blue top and black shorts), 'Printed Polyester Women Cricket Jersey' (a pink cricket jersey with 'RAO' on it), and 'Adidas Womens Weightlifting Singlet CrazyPowerSuit' (a black singlet). Each product has a 'Shop Now' button. The bottom of the screen shows a taskbar with various icons and system status.

Kids Page:

The screenshot shows the Kids page of the SportiShopify website. At the top, there is a navigation bar with links for Men, Women, Kids, New Arrivals, and Commodity. A search bar is also present. On the left side, there is a sidebar with sections for 'New Arrivals' (listing Sports wear and Sports shoes) and 'Shop by product' (listing badminton wear, swim wear, cricket wear, and football wear). The main content area features three product cards: 'Kids Swimwear / Swimming Costume' (a girl in a purple and teal swimsuit), 'Kids Polo T-shirt Badminton Clothes Kit Badminton Jersey' (a boy in a yellow polo shirt and black shorts holding a racket), and 'Girl's Sports Leggings Kids Neon Casual' (a girl in grey leggings). Each card includes a 'Shop Now' button.

New Arrivals Page:

The screenshot shows the New Arrivals page of the SportiShopify website. The layout is similar to the Kids page, with a navigation bar at the top and a sidebar on the left. The sidebar includes sections for 'New Arrivals' (listing Sports mens wear, Sports women wear, Sports kids wear, Men shoes, Women shoes, and kids shoes) and 'Shop by product' (listing Mens wear, Womens wear, and kids wear). The main content area displays three products: 'Pro Sports Pace International Men's Kabaddi Dress' (a man in a blue and orange kabaddi dress), 'Inkholic Men's Cricket Sports Jersey IN1500' (a blue polo shirt with a green and blue gradient pattern), and 'AIRX football kit' (two players in orange and black football kits). Each product has a 'Shop Now' button.

Commodity Page:

The screenshot shows a web browser window for a Shopify store. The top navigation bar includes links for Men, Women, Kids, New Arrivals, and Commodity, along with a search bar and user account icons. On the left, there's a sidebar titled "Shop by product" with a list of sports categories: Footballs, Hockey, Boxing, Badminton, Golf, Archery, Tennis, Basketball, Wrestling, Cricket, Snowboarding, Cycling, Weight lifting, Gymnastics, and Volleyball. The main content area displays three products: "SUNLEY Swag Wide body Badminton Racquet Set" (two yellow and black rackets and a black cover), "M Art Pro Wooden Carrom Board 26 Inches(Medium) Size" (a wooden board with a red center and blue corners), and "Alfa AX2 COMPOSITE Hockey Stick - 37 inch (Multicolor)" (a blue and black stick). Each product has a "Shop Now" button below it.

Feedback Form:

The screenshot shows a feedback form page with a purple header and background. The title "Feedback Form" is centered at the top. Below it are four input fields: "Name" (with two separate text boxes), "Email Id:" (with an associated "E-mail Address" field), "Message / Suggestion:" (with a text area), and "How was your experience?" (with options "Very Good / Good / Bad"). A "Submit" button is located at the bottom of the form.

Testing
and
Validation

Testing and Validation

- 1) **Acceptance Testing** :- Acceptance Testing is performed by the client and verifies that the system is full fill the business requirements and as it is as per the needs of the end-user. Client accepts these website because all the features and functionalities work as expected. It is the last phase of the testing, after which the website goes into production. This is also called User Acceptance Testing (UAT).
- 2) **Accessibility Testing** :- Accessibility Testing is determine that the website is accessible via through internet. Here, disability means deaf, color blind, mentally disabled, blind, old age and other disabled groups. Various checks are performed such as font size for visually disabled, color and contrast for color blindness, etc.
- 3) **Beta Testing** :- Beta Testing is a formal type of website Testing which is carried out by the customer. It is performed in the Real Environment before releasing the website to the market for the actual end-users. Beta Testing is carried out to ensure that there are no major failures in the software or food product and it satisfies the food business requirements from an end-user perspective. Beta Testing is successful when the customer accepts the software.
- 4) **Back-end Testing** :- Whenever an input or data is entered on front-end webpage, it stores in the database and the testing of such database is known as Database Testing or Backend 106 Testing. There are different databases like SQL Server, MySQL, and Oracle, etc. Database Testing involves testing of table structure, schema, stored procedure, data structure and so on.

5) Browser Compatibility Testing :- It is a subtype of Compatibility Testing (which is explained below) and is performed by the testing team. Browser Compatibility Testing is performed for web applications and it ensures that the software can run with the combination of different browser and operating system. This type of testing also validates whether web application runs on all versions of all browsers or not. And these website is compatible with any browser.

6) Compatibility Testing :- It is a testing type in which it validates how software behaves and runs in a different environment, web servers, hardware, and network environment. Compatibility testing ensures that web application can run on a different configuration, different database, different browsers, and their versions. Compatibility testing is performed by the testing team.

7) Component Testing :- It is mostly performed by developers after the completion of unit testing. Component Testing involves testing of multiple functionalities as a single code and its objective is to identify if any defect exists after connecting

System Security Measures

SYSTEM SECURITY, MEASURES

We take security seriously at sportishopify website. If you are a security researcher or expert, and believe you've identified security-related issues with sportishopify website, we would appreciate you disclosing it to us responsibly. Our team is committed to addressing all security issues in a responsible and timely manner, and ask the security community to give us the opportunity to do so before disclosing them publicly.

Please submit a bug to us on our sportishopify website feedback page, along with a detailed description of the issue and steps to reproduce it, if any. We trust the security community to make every effort to protect our users data and privacy.

The feedback form will help the user to solve their problems related to the website the feeback form will help us to solve all the problems relared to the website.the problems will be solved in minimum time after the submission of the problem on feedback form.

Implementation Evaluation Maintenance

Implementation

Implementation refers to post-sales process of guiding a client from purchase to use of the software or hardware that was purchased. This includes requirements analysis, scope analysis, customizations, systems integrations, user policies, user training and delivery.

In current system we find more bugs and errors , so these bugs and errors get solved in new system .Here we made new system which generally focuses on the customer satisfaction, security and profile. Here we also implement the feedback option , so we can easily find out the customer emotion and satisfaction , generally sportishopify website feedback form for the customers satisfaction.

As this website is the Ecommerce website so here we implement more and more information about the product and its related services that other website doesn't have to much as in this website we collect all the information of the product and put to this website so the user get the purchase it.

Evaluation

Evaluation is a process that critically examines a program. It involves collecting and analyzing information about a program's activities, characteristics, and outcomes. Its purpose is to make judgements about a program, to improve its effectiveness and to inform programming decisions.

The evaluation process includes the study of the existing system there drawbacks and the various option to improve the system.the concentration should be on the satisfying the primary requirments of the users.the system is evaluated on the basis of: In this project evaluation is made on theexisting and their drawbacks,what improvments can be provides facility to users.collecting the data required for improvments it in real use.

Maintance

In day to day basis and according to the market value and demand, We have to maintained our website in terms of order and money value. Day to Day transaction between the customer and the website will be maintain and successfully stored in the database.

Maintenance is necessary because to make the market we have to attract the customer with the help of daily offer and discount so that the restaurant will grow and GDP growth will also increase.

To save the Sports information and product information in the database so we need a upgraded technology and software so from these we can store the large amount of data in the database and easily access the database. Day to day made implementation is necessary according to the user requirement , these implementation make the website well maintained and market suitable and also generate employment.

Future Scope of the Project

Future scope of the project

As we know that now a days people mostly do shopping on the ecommerce website due to this it has changed the shopping experiences of the customer as they get everthing under one platform people can buy whatever they want anytime and at everywhere irrespective of place and the time .the ecommerce has maintained in the market by giving customer good services with great discount and easy delivery of the product to the doorstep. It also existed to the unorgamised and fragmented market in india .people today are looking for the convienience and quick service when it comes to delivery of the product the plan is to expand at the current pace we intend to spread our presence both across and within cities in the country.

The focus will be on the growth and customer acquisition .customer focus will continue to remain a key tent of our philosophy .

We can add fashionable sports clothing anf footwear according to the fashion trend and also according to the comfort and need of the project.and we can fitness apparels and also equipment related to it so that customer don't have to roam anywhere at other platform they will get it under one platform. We will also add toys for the basic which will act like basic sports equipment for the childrens and one main things which we will add to the project is that we will addd nutrition like protein shakes and cerastine ,codd liver oil etc which will be beneficial for the customer.

Suggestion and Conclusion

Conclusion

The project sportshopify had used the at Html ,Css front end and Php at the backend to computerized the process of online buying and selling of the sports items.

However a lots of features are already incorporated in these project the man beneficiaries is many of the customers will deal with different varities of the sports good or items. Moreever extra features can be identified and incorporated in the future in order to accomadation additional features it will take longer time and effort to understand the requirement and converting it into customerized system.

This has saved time of the cutomer by not visting the shop everytime and also they can buy the desired product they want at anttime and at any place ,anywhere by simply on one click .the site allows the customer to browse for the desired product and according to their choice and also according to their budget as that they will be completely confident before buying any product o the site and due to this online shopping becomes more convienient and more enjoyable than real world shopping to the customer.

Online shopping is one of the application to improve the marleting aof any particular company at worldwide platform. This technology has actually reduce the paper work related to buyng and selling of the product and also had reduced the use of the paper awwhich is good for the environment and is also indirectly a step towards the cash economy. The knowledge that I have gained during developing these website will not help in exams but also in my future as well.

A
PROJECT SYNOPSIS
ON
“SportiShopify Website”

Submitted to
**G. S. COLLEGE OF COMMERCE & ECONOMICS, NAGPUR
AUTONOMOUS**
In the Partial Fulfillment of
B.Com. (Computer Application) Final Year

Synopsis Submitted by
Amey Pimplapure
Charu Nagtode

Under the Guidance of
Pravin J. Yadao

**G. S. COLLEGE OF COMMERCE & ECONOMICS, NAGPUR
AUTONOMOUS**
2021-2022

1. Introduction: (Write 4 to 5 lines)

The project is aimed at developing a website of sports equipment. Every sport has its own equipment and every single game is different in activities and actions. So due to those diverse sports, the materials for playing become very important and need to be brought and make available to the demanding person. It should be fast and easy and it should be very classified in store to catch it very fast.

2. Objectives of the project: (Write only 5 points)

1. To create a user-friendly website for sports lovers.
2. To make available information about sports and its related things.
3. To create easy and convenient website

3. Project Category: Sport E-commerce website**4. Tools/ Platform/ Languages to be used:**

Html, CSS, php.

5. Scope of future application: (Write 4 to 5 points)

1. We can add fashionable sports clothing and footwear.
2. We can add fitness apparel and equipment.
3. We can expand and add toys for children.
4. We can add sports nutrition.
