ACKNOWLEDGEMENT

We take this opportunity to express our deep gratitude and whole hearted thanks to project guide Prof. Pravin Yadao, Coordinator for his guidance throughout this work. We are very much thankful to him for his constant encouragement, support and kindness.

We are also grateful to our teachers Prof. Rahul Tiwari, Prof. Sushma Gawande, Prof. Preeti Rangari, Prof. Prajkta Deshpande and Prof. Haresh Naringe for their encouragement, help and support from time to time.

We also wish to express our sincere thanks to Principal Dr. N. Y. Khandait for providing us wide range of opportunities, facilities and inspiration to gather professional knowledge and material without which this project could not have been completed.

DECLARATION

We **(student names)** hereby honestly declare that the work entitled **"PROJECT NAME"** submitted by us at G. S. College of Commerce & Economics, Nagpur (Autonomous) in partial fulfillment of requirement for the award of B.Com. (Computer Application) degree by Rashtrasant Tukadoji Maharaj, Nagpur University, Nagpur has not been submitted elsewhere for the award of any degree, during the academic session 2021-2022.

The project has been developed and completed by us independently under the supervision of the subject teacher and project guide.

Sakshi Dubey

Date: Muskan Khatarkar

Place: Nagpur

Introduction

The Indian Financial System refers to all institutions, structures, and services that provide pecuniary facilities to the public. The financial system enables lenders and borrowers to exchange funds. India has a financial system that is controlled by independent regulators in the sectors of insurance, banking, capital markets and various services sectors. Thus, a financial system can be said to play a significant role in the economic growth of a country by mobilizing the surplus funds and utilizing them effectively for productive purpose. Financial institutions are also termed as financial intermediaries because they act as middle between savers by accumulating Funds them and borrowers by lending thesefund. The term financial system is a set of inter-related activities/services working together to achieve some predetermined purpose or goal. It includes different markets, the institutions, instruments, services and mechanisms which influence the generation of savings, investment capital formation and growth. India has a diversified financial sector undergoing rapid expansion, both in terms of strong growth of existing financial services firms and new entities entering the market. The sector comprises commercial banks, insurance companies, non-banking financial companies, co-operatives, pension funds, mutual funds and other smaller financial entities.

FINANCIAL SYSTEM SAVINGS FINANCE The Concept of the Financial System The process of savings, finance and investment involves financial institutions, markets, instruments and services. Above all, supervision control and regulation are equally significant.

The banking regulator has allowed new entities such as payment banks to be created recently, thereby adding to the type of entities operating in the sector. However, financial sector in India is predominantly a banking sector with commercial banks accounting for more than 64% of the total assets held by the financial system. The Government of India has introduced several reforms to liberalise, regulate and enhance this industry. The Government and Reserve Bank of India (RBI) have taken various measures to facilitate easy access to finance for Micro, Small and Medium Enterprises (MSMEs). These measures include launching Credit Guarantee Fund Scheme for MSMEs, issuing guideline to banks regarding collateral requirements and setting up a Micro Units Development and Refinance Agency (MUDRA). With a combined push by Government and private sector, India is undoubtedly one of the world's most vibrant capital markets.

Special Financial Products Offered for Attaining Financial Inclusion

Keeping in mind that low-income people living in rural and urban areas have very limited access to financial products and services, scheduled commercial banks (SCBs) have been asked by the Reserve Bank of India to design and offer

exclusive financial products to the economically weaker sections of the society. Many of them are only aware of basic financial services such as savings Scheme accounts, Personal loans, crop loans microfinance, etc. They do not know anything about credit cards or debit cards.

However, due to their lack of access to instant credit facilities, banks were instructed to issue cost-efficient credit cards to the low-income groups of the society. Some of the special financial products provided to them include:

- **General Credit Cards (GCC):** Banks were asked by the RBI to launch and offer General Credit Card facilities with an amount of up to Rs.25,000 at their branches located in semi-urban and rural areas.
- **Kissan Credit Cards (KCC):** The Reserve Bank of India also instructed banks to provide Kissan Credit Cards exclusively to small farmers who earn very low incomes and who have very limited funds due to which they cannot invest in proper farming tools, fertilizers, pesticides, crop seeds, tractors, land for farming, storage warehouses, etc. They are forced to rely on other wealthy landlords for getting land to sow crops. These Kissan Credit Cards are intended to help farmers make instant purchases whenever required. Many a time, farmers give up on purchasing things required for their occupation due to lack of funds.
- **ICT-Based Accounts via BCs:** The Reserve Bank also devised a plan to help banks to reach out to the unbanked individuals of the society by offering information and communications technology (ICT)-based bank accounts with the help of business correspondents (BCs). These accounts allow users to make withdrawals of cash, create deposits, and apply for loans and other forms of credit through electronic forms. This type of account makes banking inexpensive and simple.
- **Increase in ATMs:** The Reserve Bank of India also reported that many rural parts of the nation do not have enough automated teller machines (ATMs) and this is hampering many buying and selling operations of the people residing in those areas. In order to increase the availability of physical cash for these people, the number of ATMs increased massively.

Objectives: -

- Financial inclusion intends to help people secure financial services and products at economical prices such as deposits, fund transfer services, loans, insurance, payment services, etc.
- It aims to establish proper financial institutions to cater to the needs of the poor people. These institutions should have clear-cut regulations and should maintain high standards that are existent in the financial industry.
- Financial inclusion aims to build and maintain financial sustainability so that the less fortunate people have a certainty of funds which they struggle to have.
- Financial inclusion also intends to have numerous institutions that offer affordable financial assistance so that there is sufficient competition so that clients have a lot of options to choose from. There are traditional banking options in the market.
- Financial inclusion intends to increase awareness about the benefits of financial services among the economically underprivileged sections of the society.
- The process of financial inclusion works towards creating financial products that are suitable for the less fortunate people of the society.
- Financial inclusion intends to improve financial literacy and financial awareness in the nation.
- Financial inclusion aims to bring in digital financial solutions for the economically underprivileged people of the nation.
- It also intends to bring in mobile banking or financial services in order to reach the poorest people living in extremely remote areas of the country.

Preliminary System Analysis

Preliminary Investigation: The initial step in the system development is identification of need. This is a user's request to change, improve or enhance an existing system. While developing a webpage we explore various webpages but in all webpage more of the webpages are informational rather than it contains information about the financial system in India.

- **Present System in Use**: Present system comprises all the information related to financial system in India enables lenders and borrowers to exchange funds. India has a financial system that is controlled by independent regulators in the sectors of insurance, banking, capital markets and various services sector. The Government of India has been introducing several exclusive schemes for the purpose of financial inclusion. These schemes intend to provide social security to the less fortunate sections of the society.

- **Flaws in present system**: Present system has various limitations such as the Indian financial system fails to create a wel defined and organized capital market. It fails to motivate economically marginal or small entrepreneurs by providing micro credit to them. The Indian financial system is not flexible at the desired level. It takes abnormal time to cope with the changing situation.

Factoring Asset Liability Management
Leasing Housing Finance
Forfeiting Portfolio Finance
Hire Purchase Finance Underwriting
Credit Card Credit rating
Merchant Banking Interest and Credit Swap
Book Building Mutual fund

- **Need for new system:** Current system is not compatible because of slow functioning of current system and with new system it will work much more efficiently to operate a webpage. With new system we can store large amount of data using new system.

Feasibility Study

Introduction

A feasibility study is a report that aims to determine the practicality, strengths and weaknesses of a proposed project, existing system or corporation as a whole. Project managers use feasibility studies to discern the pors and cons of undertaking a project before they invest a lot of time and money into it.

1. Technical Feasibility

This assessment focuses on the technical resources available to the organization. It helps organizations determine whether the technical resources meet capacity and whether the technical team is capable of converting the ideas into working systems. Technical feasibility also involves the evaluation of the hardware, software, and other technical requirements of the proposed system. As an exaggerated example, an organization wouldn't want to try to put Star Trek's transporters in their building—currently, this project is not technically feasible.

2. Economic Feasibility

This assessment typically involves a cost/ benefits analysis of the project, helping organizations determine the viability, cost, and benefits associated with a project before financial resources are allocated. It also serves as an independent project assessment and enhances project credibility—helping decision-makers determine the positive economic benefits to the organization that the proposed project will provide.

3. Legal Feasibility

This assessment investigates whether any aspect of the proposed project conflicts with legal requirements like zoning laws, data protection acts or social media laws. Let's say an organization wants to construct a new office building in a specific location. A feasibility study might reveal the organization's ideal location isn't zoned for that type of business. That organization has just saved considerable time and effort by learning that their project was not feasible right from the beginning.

4. Operational Feasibility

This assessment involves undertaking a study to analyse and determine whether—and how well—the organization's needs can be met by completing the project. Operational feasibility studies also examine how a project plan satisfies the requirements identified in the requirements analysis phase of system development.

5. Scheduling Feasibility

This assessment is the most important for project success; after all, a project will fail if not completed on time. In scheduling feasibility, an organization estimates how much time the project will take to complete.

Project Category

A category of a project is webpage named India". A webpage is designed using HTML, CSS. A webpage gives an complete information to customer related to Financial System In India.

Programming Language Used in Project

HTML: Hypertext Markup Language is the standard markup language for documents designed to be displayed in a web browser. It can be assisted by technologies such a Cascading Style Sheet (CSS) and scripting languages such as JavaScript.

HTML web browser is a software application specifically for the purpose of reading HTML instructions and displaying the resulting Web page. It is a fully functional software that can interpret and display HTML Web pages, applications, JavaScript, AJAX and other content hosted on Web servers. HTML is responsible for telling a Web browser how text and other objects in a Web document should appear.

HTML Elements is a component of an HTML document that tells a web browser how to structure and interpret a part of the HTML document. HTML elements can contain formatting instructions, semantic meaning, and content.

For example, HTML elements are used to denote document parts such as headers, paragraphs, and footers and to embed content such as hyperlinks, text, and images. Although HTML can be used to provide formatting instructions, HTML standards strongly encourage using CSS for this purpose instead.

CSS: C*ascading Style Sheet* is a simple design language intended to simplify the process of making web pages presentable.CSS handles the look and feel part of a web page. Using CSS, you can control the colour of the text, the style of fonts, the spacing between paragraphs, how columns are sized and laid out, what background images or colours are used, layout designs, variations in display for different devices and screen sizes as well as a variety of other effects.

- ***Basic Structure of the Webpage:***

  - ***Tags***

- Html tag: The very first thing is doctype declaration of the document. In the entire document is placed between the <html>…</html>
- Head tag: Marks the start part of a HTML document called the head.
- Title tag: The page title can be seen in the browser window tab when you bookmark the page in your favourites. You can put anything want in between the title tag.
- Body tag: The <body> element forms the main body of the html document.
- Script tag: is used to specify client-side script such as JavaScript. It facilitates you to place a script within your HTML document.
- Line Break: Line break are different than most of the tags we have seen so far. the <br> tag is used for line break. It is an empty tag i.e. no need to add an end tag. Writing <br> tag is perfectly fine.
- Heading tag: A HTML heading or HTML h tag can be defined as a title or a subtitle which you want to display on the webpage. When you place the text within the heading tags <h1>.....</h1>, it is displayed on the browser in the bold format and size of the text depends on the number of headings.
- Form tag: The <form> tag is used to create an HTML form for user input.
- Table tag : An HTML table consists of one <table> element and one or more <tr>, <th>, and <td> elements. The <tr> element defines a table row, the <th> element defines a table header, and the <td> element defines a table cell.
- Image tag: The <img> tag is used to embed an image Html tag.

Software And Hardware Requirement Specification

Software: A Software is a collection of data computers instructions that tells the computer how to work this is contrast to physical hardware, from which the system is built and actually performs the work.

- **Internet Explorer**
- **Google Chrome**
- **XAMPP**
- **Visual Studio**

❖ **Hardware:** A Hardware is being define as a it contains how the speed of the processor and how much RAM will utilized.

- **RAM: 8GB**
- **Hardware: 500GB or more**
- **Input: Keyboard and Mouse**

❖ **Operating System:**

Windows 11 Ryzon 5

With >2,100 fintechs operating currently, India is positioned to become one of the largest digital markets with rapid expansion of mobile and internet.

<h5 class="text-center mb-4">Innovation</h5>
<ul class="text-center">
India benefits from a large cross-utilization of channels to expand reach of financial services.
Emerging digital gold investment options.
In September 2021, eight Indian banks announced that they are rolling out—or about to roll out—a system called ‘Account Aggregator’ to enable consumers to consolidate all their financial data in one place.

<h5 class="text-center mb-4">Policy support</h5>
<ul class="text-center">
The government has approved 100% FDI for insurance intermediaries and increased FDI limit in the insurance sector to 74% from 49% under the Union Budget 2021-22.

<h5 class="text-center mb-4">Growing Penetration</h5>
<ul class="text-center">
Credit, insurance and investment penetration is rising in rural areas.
HNWI participation is growing in the wealth management segment.
Lower mutual fund penetration of 5-6% reflects latent growth opportunities.

<h5 class="mb-3">Introduction</h5>
India has a diversified financial sector undergoing rapid expansion, both in terms of strong growth of existing financial services firms and new entities entering the market. The sector comprises commercial banks, insurance companies, non-banking financial companies, co-operatives, pension funds, mutual funds and other smaller financial entities. The banking regulator has allowed new entities such as payment banks to be created recently, thereby adding to the type of entities operating in the sector. However, financial sector in India is predominantly a banking sector with commercial banks accounting for more than 64% of the total assets held by the financial system.
The Government of India has introduced several reforms to liberalise, regulate and enhance this industry. The Government and Reserve Bank of India (RBI) have taken various measures to facilitate easy access to finance for Micro, Small and Medium Enterprises (MSMEs). These measures include launching Credit Guarantee Fund Scheme for MSMEs, issuing guideline to banks regarding collateral requirements and setting up a Micro Units Development and Refinance Agency (MUDRA). With a combined push by Government and private sector, India is undoubtedly one of the world's most vibrant capital markets.

<img class="h-100" src="./images/Financial-Services-2.jpg" alt="finance image">

<h5 class="mb-3 mb-4">Market Size</h5>

<img src="./images/financial-services.jpg">

As of October 2021, AUM managed by the mutual funds industry stood at Rs. 37.33 trillion (US$ 500.67 billion).
As of October 2021, the total number of accounts stood at 114.4 million.
As of August 2021, AUM managed by the mutual funds industry stood at Rs. 36.59 trillion (US$ 492.77 billion) and the total number of accounts stood at 108.5 million. In May 2021, the mutual fund industry crossed over 10 crore folios. Inflow in India's mutual fund schemes via systematic investment plan (SIP) were Rs. 96,080 crore (US$ 13.12 billion) in FY21. Equity mutual funds registered a net inflow of Rs. 8.04 trillion (US$ 114.06 billion) by end of December 2019.

Another crucial component of India’s financial industry is the insurance industry. Insurance industry has been expanding at a fast pace. The total first year premium of life insurance companies reached Rs. 2.59 lakh crore (US$ 36.73 billion) in FY20.
Furthermore, India’s leading bourse, Bombay Stock Exchange (BSE), will set up a joint venture with Ebix Inc to build a robust insurance distribution network in the country through a new distribution exchange platform.
In FY22*, premiums from new businesses of life insurance companies in India stood at US$ 17.6 billion.
Between April 2021 and October 2021, gross premiums written off by non-life insurers reached Rs. 126,385.4 crore (US$ 16.96 billion).
Between April 2021 and September 2021, gross premiums written off by non-life insurers reached Rs. 108,705.3 crore (US$ 14.47 billion), an increase of 12.8% over the same period in FY21.
In FY21, US$ 4.25 billion was raised across 55 initial public offerings (IPOs). In FY21, the number of listed companies on the NSE and BSE were 1,920 and 5,542, respectively.
According to the statistics by the Futures Industry Association (FIA), a derivatives trade association, the National Stock Exchange of India Ltd. (NSE) emerged as the world’s largest derivatives exchange in 2020 in terms number of contracts traded. NSE was ranked 4th worldwide in cash equities by number of trades as per the statistics maintained by the World Federation of Exchanges (WFE) for CY2020.
India is expected to have 6.11 lakh HNWIs in 2025.

<h5 class="mb-3 mb-4">Investments</h5>

In September 2021, eight Indian banks announced that they are rolling out—or about to roll out—a system

called ‘Account Aggregator’ to enable consumers to consolidate all their financial data in one place.

In September 2021, Piramal Group concluded a payment of Rs. 34,250 crore (US$ 4.7 billion) to acquire
Dewan Housing Finance Corporation (DHFL).
Digital payment platforms for rural India:

In July, Dvara Kshetriya Gramin Financial Services Pvt Ltd., an NBFC operating in remote rural
areas of India, acquired ‘TransactNow’ digital platform, an early phase tech start-up that
provides digital financial services to India's unbanked and underserved population.
In August 2021, Neokred, an open banking stack that delivers curated versions of issuance in the
payment ecosystem, teamed with Virenxia, a provider of integrated and sustainable solutions for
rural transformation and development, to launch the ‘The Kisan Card,' a special payment card for
Indian farmers.

In May 2021, the Reserve Bank of India (RBI) granted authorisation to Eroute Technologies to operate as
a prepaid payment instruments (PPI) company.
In February 2021, the Reserve Bank of India (RBI) cleared the Rs. 34,250 crore (US$ 4.7 billion)
acquisition of Dewan Housing Finance Corporation (DHFL) by the Piramal Group.
In January 2021, Sundaram Asset Management Company announced the acquisition of Principal Asset
Management for Rs. 338.53 crore (US$ 46.78 million).
In January 2021, the National Stock Exchange (NSE) launched derivatives on the Nifty Financial Service
Index. This service index is likely to provide institutions and retail investors more flexibility to
manage their finances.
In September 2021, Unified Payments Interface (UPI) recorded 3.65 billion transactions worth Rs. 6.5
trillion (US$ 86.63 billion).
The number of transactions through immediate payment service (IMPS) reached 384.88 million (by volume)
and amounted to Rs. 3.18 trillion (US$ 43.19 billion) in September 2021.
In August 2021, Unified Payments Interface (UPI) recorded 3.55 billion transactions worth Rs. 6.39 lakh
crore (US$ 86.00 billion).
The number of transactions through immediate payment service (IMPS) reached 377.94 million (by volume)
and amounted to Rs. 3.18 trillion (US$ 42.85 billion) in August 2021.

<h5 class="mb-3 mb-4">Government Initiatives</h5>

On September 30, 2021, the Reserve Bank of India communicated that the applicable average base rate to
be charged by non-banking financial company - micro finance institutions (NBFC-MFIs) to their borrowers
for the quarter beginning October 1, 2021, will be 7.95%.
On September 30, 2021, the IFSC Authority constituted an expert committee to recommend approach towards

development of sustainable finance hub and provide road map for the same.

In August 2021, Prime Minister Mr. Narendra Modi launched e-RUPI, a person and purpose-specific digital

payment solution. e-RUPI is a QR code or SMS string-based e-voucher that is sent to the beneficiary's

cell phone. Users of this one-time payment mechanism will be able to redeem the voucher at the service

provider without the usage of a card, digital payments app, or internet banking access.

In July 2021, Rajya Sabha approved the Factoring Regulation (Amendment) Bill in 2020, enabling ~9,000

NBFCs to participate in the factoring market. The bill also gives the central bank the authority to

establish guidelines for improved oversight of the US$ 6 billion factoring sector.

In July 2021, India's largest commodities derivatives exchange, Multi Commodity Exchange of India Ltd.,

and European Energy Exchange AG (EEX) signed a memorandum of understanding (MOU) with the goal of

knowledge sharing and expertise exchange on electricity derivative products. This MoU will make it

easier for the two exchanges to collaborate in areas including knowledge sharing, education and

training, and event planning in the field of electricity derivatives.

The government has approved 100% FDI for insurance intermediaries and increased FDI limit in the

insurance sector to 74% from 49% under the Union Budget 2021-22.

In January 2021, the Central Board of Direct Taxes launched an automated e-portal on the e-filing

website of the department to process and receive complaints of tax evasion, foreign undisclosed assests

and register complaints against 'Benami' properties.

<h5 class="mb-3 mb-5">Road Ahead</h5>

<img src="./images/Financial-Services-3.jpg" alt="">

India is expected to be the fourth largest private wealth market globally by 2028.

India is today one of the most vibrant global economies on the back of robust banking and

insurance sectors. The relaxation of foreign investment rules has received a positive response

from the insurance sector, with many companies announcing plans to increase their stakes in

joint ventures with Indian companies. Over the coming quarters, there could be a series of joint

venture deals between global insurance giants and local players.

The Association of Mutual Funds in India (AMFI) is targeting nearly five-fold growth in AUM to

Rs. 95 lakh crore (US$ 1.47 trillion) and more than three times growth in investor accounts to

130 million by 2025.

India's mobile wallet industry is estimated to grow at a Compound Annual Growth Rate (CAGR) of

150% to reach US$ 4.4 billion by 2022, while mobile wallet transactions will touch Rs. 32

trillion (USD$ 492.6 billion) during the same period.

```
                <li>According to Goldman Sachs, investors have been pouring money into India's stock market, which
                is likely to reach >US$ 5 trillion, surpassing the UK, and become the fifth-largest stock market
                worldwide by 2024.</li>
              </ul>

Testing and validation

❖ **TESTING:**

Testing is finding out how well something works. In terms of human beings, testing tells what level of knowledge or skill has been acquired. In computer hardware and software development, testing is used at key checkpoints in the overall process to determine whether objectives are being met. For example, in software development, product objectives are sometimes tested by product user representatives.

❖ TYPES OF TESTING:

Accessibility Testing

Accessibility testing is the practice of ensuring your mobile and web apps are working and usable for users without and with disabilities such as vision impairment, hearing disabilities, and other physical or cognitive conditions.

End to End Testing

End to end testing is a technique that tests the application's workflow from beginning to end to make sure everything functions as expected.

Functional Testing

Functional testing checks an application, website, or system to ensure it's doing exactly what it's supposed to be doing.

Load Testing

This type of non-functional software testing process determines how the software application behaves while being accessed by multiple users simultaneously.

Performance Testing

Performance testing examines the speed, stability, reliability, scalability, and resource usage of a software application under a specified workload.

Regression Testing

Regression testing is performed to determine if code modifications break an application or consume resources.

Sanity Testing

Performed after bug fixes, sanity testing determines that the bugs are fixed and that no further issues are introduced to these changes.

Security Testing

Security testing unveils the vulnerabilities of the system to ensure that the software system and application are free from any threats or risks. These tests aim to find any potential flaws and weaknesses in the
software system that could lead to a loss of data, revenue, or reputation per employees or outsides of a company.

Single User Performance Testing

Single user performance testing checks that the application under test performs fine according to specified threshold without any system load. This benchmark can be then used to define a realistic threshold when the system is under load.

Unit Testing

Unit testing is the process of checking small pieces of code to ensure that the individual parts of a program work properly on their own, speeding up testing strategies and reducing wasted tests.

VALIDATION

- **VALIDATION** : Validation projects are carried out by regulated companies to demonstrate that their software or system is working as it should and not in ways it wasn't designed to.

- The validation process is not limited to a phase at the end of system development, but generally occurs at the end of financial system in India, and always at the end of each milestone of a development project.

Validation is a generic term that needs to be instantiated within the context it occurs, When understood as a process, validation is a transverse activity of the finance development in Indian system, the validation process is performed in parallel with the system definition and system realization process.

Market Size

Leading AMCs in India (as of June 2021)

Top 5 AMCs in India	AUM (US$ billion)
SBI Mutual Fund	70.23
HDFC Mutual Fund	55.97
ICICI Prudential Mutual Fund	55.93
Aditya Birla Sun Life Mutual Fund	36.97
Kotak Mahindra Mutual Fund	33.10

Another crucial component of India's financial industry is the insurance industry. Insurance industry has FY20.

Top 5 AMCs in India	AUM (US$ billion)
SBI Mutual Fund	57.4
HDFC Mutual Fund	51.18
ICICI Prudential Mutual Fund	50.13
Birla Sun Life Mutual Fund	32.5
Nippon India Mutual Fund	27.37

Industry Contacts

- Ministry of Finance
- Securities and Exchange Board of India (SEBI)
- Insurance Regulatory and Development Authority (IRDA)

- India Banks Association

SECURITY MEASURES

System security refers to the technical innovation and procedure applied to the hardware and operating system against deliberate or accidental damage rom a defined thread.

- Data security is the protection of data from loss, disclosure, modification, and destruction.
- Privacy defines the rights of the user organization to determine what information they are willing to share or access from others and how the organization can be protected against unwelcome, unfair, or excessive dissemination of information about it.
- The controls are classified into three general categories:-
    - ✓ Database integrity through data validation techniques
    - ✓ Control measure through password, encryption, and monitoring users on a regular on a regular basis.
    - ✓ Physical security from fire, flood, and other physical damage.

Implementation, Evaluation and Maintenance

Implementation

Implementation is the carrying out, execution, or practice of a plan a method or any design idea model specification standard or policy for doing something. As such implementation is the action that must follow any preliminary thinking in order for something to actually happen.

Information technology context, software or hardware implementation encompasses all the post-sale processes involved in something operating properly in its environment, including analysing requirements installing configuration customization running testing system integration user training delivery ang making necessary changes.

Evaluation

Evaluation is a process that critically a program. It involves collection and analysing information about a program activities, characteristics and outcomes. Its purpose is to make judgement about the program to improve its effectiveness and to improve programming decisions.

The aim is to determine the relevance and level of achievement of project objectives, development effectiveness, efficiency, impact and sustainability. Evaluation also feeds lessons learned into the decision-making process of the project.

Objectives of project evaluation:

- **Assure quality of project**
- **Analyses of project implementation**
- **Identify project risk**
- **Asses and enhance project performance**
- **Analyses of cost of project**
- **To check compatibility of project**

MAINTENANCE

Maintenance can be classified as corrective, adaptive or perfective. Corrective maintenance means repairing processing or performance failure or making changes because of previously uncorrected problems of false assumption. Adaptive maintenance means changing the program function. Perfective maintenance means enhance the performance or modifying the program respond to user additional or changing needs.

Maintenance means restoring something to its original conditional. Unlike hardware, however software does not ware out it is corrected. Although software does not ware out like a piece of hardware, it eventually fails to perform because of cumulative maintenance.

Maintenance covers wide range of activities including correcting coding and design error , update documentation and test data and upgrading users support.

FUTURE SCOPE

1. **Customer Oriented:** Financial services are customer-focused services that are offered as per the requirements of customers. Financial institutions properly study customer needs before designing and offering such services. They are meant to fulfill the specific needs of a customer which differs from person to person.
2. **Intangibility**: These services are intangible which makes their marketing a challenging task for financial institutions. Such institutions need to focus on building their brand image by providing innovative and quality products to customers. Firms enjoying better credibility in market are easily able to sell off their products.
3. **Inseparable:** Financial services are produced and delivered at the same time simultaneously. These services are inseparable and can't be stored in advance. Here production and supply function both occurs at the same time.
4. **Manages Fund:** Financial services are specialized at managing funds of people. These services enable peoples in allocating their idle lying funds into useful means for earning revenues. Financial services provide various means to people for converting their savings into investment.
5. **Financial Intermediation:** These services does the work of financial intermediation as it brings together the lender and borrower. Financial services mobilize the funds of people who are having enough of it and made it available to the one who are in need of it.
6. **Market Based:** Financial services are market based which changes as per the changing conditions. activity which varies as per the variations in socio-economic environment and varying needs of customers.

Suggestion & Conclusion

Indian Financial System accelerates the rate and volume of savings through the provision of various financial instruments and efficient mobilization of savings. It aids in increasing the national output of the country by providing funds to corporate customers to expand their respective business. It helps economic development and raising the standard of living of people and promotes the development of the weaker section of society through rural development banks and co-operative societies. These are the important facts about the Indian Financial system.

We have designed this website using HTML and CSS, which is helpful to create an attractive website. Various tags has been used which will give attractive look to the website.

Through our website we can used directly get information of financial system in India .

PROJECT SYNOPSIS

ON

Introduction about financial system in Indi

Submitted to

G. S. COLLEGE OF COMMERCE & ECONOMICS, NAGPUR

AUTONOMOUS

In the Partial Fulfillment of

B.Com. (Computer Application) Final Year

Synopsis Submitted by

Sakshi Dubey

Muskan khatarkar

Under the Guidance of

Pravin J. Yadao

G. S. COLLEGE OF COMMERCE & ECONOMICS, NAGPUR

AUTONOMOUS

2021-2022

. Introduction:

A financial system is a set of institutions, such as banks, insurance companies, and stock exchanges, that permit the exchange of funds.Borrowers, lenders, and investors exchange current funds to finance projects, either for consumption or productive investments, and to pursue a return on their financial assets.

Financial systems can be organized using market principles, central planning, or a hybrid of both.

2. Objectives of the project:

To create a structured payment system

To give money the time value as it deserves

To reduce risks and compensate for the same through offering products and services

To enable the most efficient economic resource allocation

3. Project Category: ___webpage_____

4. Tools/ Platform/ Languages to be used: ____PHP, MSQL,HTML_CSS_____

5. Scope of future application:

(i) Underwriting of or investment in shares, debentures, bonds etc. of new issues (primary market activities) (ii) Dealing in secondary market activities. (iii) Participating in money market instruments like commercial papers, certificate of deposits, treasury bills, discounting of bills etc.
