

A  
PROJECT  
ON  
**“BUS TRANSPORTATION INFORMATION  
SYSTEM FOR NAGPUR CITY”**

**Submitted to**

**Shiksha Mandal’s**

**G. S. COLLEGE OF COMMERCE & ECONOMICS, NAGPUR  
(AUTONOMOUS)**

**In the Partial Fulfillment of**

**B.Com. (Computer Application) Final Year**

**Submitted by**

**Purva Bobade**

**Krutika Kanekar**

**Under the Guidance of**

**Pravin J. Yadao**

**Shiksha Mandal’s**

**G. S. COLLEGE OF COMMERCE & ECONOMICS, NAGPUR  
(AUTONOMOUS)**

**2021-2022**

**Shiksha Mandal's**  
**G. S. COLLEGE OF COMMERCE & ECONOMICS, NAGPUR**  
**(AUTONOMOUS)**

**CERTIFICATE**  
**(2021 - 2022)**

This is to certify that **Miss. Purva Bobade & Krutika Kanekar** has completed their project on the topic of “**Bus Transportation information system for Nagpur City**” prescribed by G. S. College of Commerce & Economics, Nagpur (Autonomous) for B.Com. (Computer Application) – Semester-VI.

**Date:**

**Place: Nagpur**

**Pravin J. Yadao**  
**Project Guide**

**External Examiner**

**Internal Examiner**

## **ACKNOWLEDGEMENT**

We take this opportunity to express our deep gratitude and whole hearted thanks to project guide Prof. Pravin Yadao, Coordinator for his guidance throughout this work. We are very much thankful to him for his constant encouragement, support and kindness.

We are also grateful to our teachers Prof. Rahul Tiwari, Prof. Sushma Gawande, Prof. Preeti Rangari, Prof. Prajkta Deshpande and Prof. Haresh Naringe for their encouragement, help and support from time to time.

We also wish to express our sincere thanks to Principal Dr. N. Y. Khandait for providing us wide range of opportunities, facilities and inspiration to gather professional knowledge and material without which this project could not have been completed.

**Purva Bobade**

**Krutika Kanekar**

Date:

Place: Nagpur

## **DECLARATION**

We **Krutika Kanekar and Purva Bobade** hereby honestly declare that the work entitled “**Bus Transportation information system for Nagpur City**” submitted by us at G. S. College of Commerce & Economics, Nagpur (Autonomous) in partial fulfillment of requirement for the award of B.Com. (Computer Application) degree by Rashtrasant Tukadoji Maharaj, Nagpur University, Nagpur has not been submitted elsewhere for the award of any degree, during the academic session 2021-2022.

The project has been developed and completed by us independently under the supervision of the subject teacher and project guide.

**Purva Bobade**

**Krutika Kanekar**

Date:

Place: Nagpur

## INDEX

# **INTRODUCTION**

## **INTRODUCTION :-**

The Maharashtra State Road Transport Corporation abbreviated as (MSRTC, or simply ST), is the state runs bus service of Maharashtra, India which serves routes to towns and cities within Maharashtra as well as to its adjoining states.

In this application, you will get all information about the Bus Transportation system for Nagpur city. The city of Nagpur is strategically located in central India. It has a vast railway network and its road network is well-maintained to avoid congestion. There are 4 modes of transportation in Nagpur (viz. Road, Railway, Air and Metro). Nagpur is connected to India's four major metropolitan areas (Mumbai, Delhi, Kolkata, Chennai) by road, rail and air. Auto rickshaws operate in most parts of the city, and are the main form of hired transport.

Nagpur Mahanagar Parivahan Limited (NMPL) is the company which operates the city bus service. It has a fleet of 487 buses, which serve about 160,000 passengers daily in the metropolitan area. Of the fleet, 17 are electric buses; 88 are low-floor Minibuses, and 382 are low-floor 50-seat Star buses. The Nagpur Mahanagar Parivahan Limited (NMPL) has 206 Bus routes in Nagpur with all Bus stops.

# **OBJECTIVES**

## **Objectives of the Website:**

- **Time Saving:** These application gives you all the types of buses at a single platform with the multiple choice of the customer. There is no need to spend much time for physically searching bus for good transfer.
- **Flexibility:** This system is the GUI application and can be access in any platform and it is very flexible to add bus and cancel also.
- **Maintenance:** Managing and maintaining data become easier and cost effective due to very high amount of reliability of storage space available in the proposed system.
- **Security:** Provide fast operations, data storage and high security for all its tasks.
- **Easy to access:** In the application, various command buttons are given on each form. Every activity related to the project can be perform at the click event of this command buttons which makes this project easy to access.
- **Easy Handling:** Any user can handle the project easily due to graphical user interface (GUI) provided in user-friendly format. There is no tedious task to handle the project as anyone can handle it.
- **Provide details about routes and schedules:** The main objective of these project is providing detail about timing schedules of the buses and routes of the Buses.
- **Provide accurate information:** Through website user can gather accurate information of all buses route and timing schedules. As it provides all Bus Stops in a Nagpur.

**PRELIMINARY SYSTEM  
ANALYSIS**

## **PRELIMINARY INVESTIGATION**

The first step in System Development Life Cycle (SDLC) is the identification of the need. This is the user request to change, improve or enhance an existing system. Because there is likely to be a stream of such request, standard procedures must be established to deal with them. The initial investigation is one way of handling this solution.

In this process, the development team visit the customer and studies their system. They investigate the need for possible software automation of the given system by the end of the preliminary investigation. Our project furnishes the document that hold the different specific recommendation of the needs of the user.

### **Investigate the present system and identify the function to be performed:**

This phase is used to recognize the need of the system. It is very important step as it provided an overall scenario and objectives of the development of any application.

At present, there is insufficient availability of suitable information of the Bus transportation of Nagpur city that available for the Public. So, in this website we make the sufficient and informative transformation to the Public which make the passengers easy for the travelling with the buses. The transportation is inter as well intra Nagpur.

### **Identify the objectives and scope of the new system:**

The website provides not only information to the passenger doorstep but also to expand the bus transportation network in large. For future scope there will 24\*7 hours availability of information of Buses which make convenient for the passengers.

### **Identify problems and suggest few solutions:**

This phase is done to find out alternative solutions for developing the website. The best way to do this is to interview the concerned people in the organization. Select the appropriate solution from the several one.

Thus, every website has a common thing and that is,

- It is organized combination of different components.
- They are independent and inter related.
- They work for common objective.

With the help of preliminary investigation, an accurate solution to the problem can be found as this stage only a rough estimate of the development of the project may be reached.

### **Present System in Use**

In the Existing system getting the bus information of bus timings and route was difficult and the lengthy process. Sometimes it takes lot time in the manual system. In the manual system to the passenger had to do to the bus depot for getting the information of the buses, but with the help for this system we can easily access the Bus information.

### **Flaws of Present System**

It is necessary to know what defects are present in the current system or the problem occurring in the current system.

Check the following things happen again and again to manage the system;

1. Is the present not recommended for work?
2. Is the defect very serious one?

**There were many flaws in existing manual system which are as follows:**

#### **1. Insufficient Information of buses:**

In exiting manual system, there is no appropriate information for the buses for the specified route or the timing of the buses.

#### **2. Loss of data:**

In the existing manual system, there is chances of loss of data because all the information is on the paper or document file based.

### **3. Time consuming:**

At present, there is lot of time required to find the appropriate bus and the timing of the bus for travelling from one destination to another. In this website, we overcome this problem by proper availability of buses.

### **Need of new system**

To solve this problem, we require a computerized system to generate question paper and handle all the works. We require a website that will provide a Bus information and ease to access the information and will reduce the time for report generation and other paper work. In today's world of computers where in every aspect of life computerization is done, so the system used should be sufficient and accurate. Thus, the need of the computerization involved the manual work becomes the tedious job.

Following are the points that talk about the need of new system i.e. "Bus Information system of the Nagpur city".

These are listed below:

#### **1. Easy availability of Bus information:**

As per the existing system, there are no proper availability of bus information as well as route of the buses. In this website, we provide the suitable information of the buses and list of routes of buses.

#### **2. User friendly:**

The website will be user friendly material as it provides images of the buses, map of routes, etc.

#### **3. Time Saving:**

This website provides quick information of the buses which results in time saving of the user in every visit.

# **FEASIBILITY STUDY**

## **Feasibility Study**

Feasibility study of a system means whether the system is practically possible to build or not. It also evaluates the benefits of the new system. A feasibility study is an analysis of how successfully a project can be completed, according to factors that affect it such as Economical, Behavioral, Technical and Operational. Project manager used feasibility studies to determine potential positive and negative outcomes of the project before investing a consideration of amount of time and money into it.

The software that has to be developed is analyzed in details and the system which is to be developed in technically, operationally and economically feasible or not is taken care of. The feasibility study means not to solve the problems completely but also to acquire the scope and work ability of the problem by giving various solutions to give problem and picking up one of the best solutions.

### **1. Economical Feasibility:**

This is a very important aspect to be considered while developing a bus information website. We decided the technology based on minimum possible cost factor.

- All hardware and software cost has to be borne by the organization
- Overall, we have estimated that the benefits the organization is going to receive from the proposed system will surely overcome the initial cost and the later on running cost for system.

### **2. Technical Feasibility:**

Technically this website is feasible in nature because in all over environment the internet access facility get well developed. This also include the study of function, performance and constrains that may affect the ability to achieve and acceptable system. For this feasibility study, we studied complete functionality to be provided in the system, as described in the system requirement specification and checked if everything was possible using different types of fronted and backend platforms.

### **3. Operating Feasibility:**

No doubt the proposed system is fully GUI based that is very user friendly and all inputs to be taken all self-explanatory even to a layman. Besides a proper training has to

being conducted to late know the essence of the system to the user so that they feel comfortable with new system. As far our study is concerned the clients are comfortable and happy as the system has cut down their loads and doing. It refers to the measure of solving problems with the help of new proposed system.

#### **4. Social Feasibility:**

Social Feasibility is a determine of either a proposed project will be acceptable to the people or not. This determination typically examines the probability of the project accepted by the group directly by the proposed system is changed. It describes the effect on users from the introduction of the new system considering whether there will be need for retaining the work force.

#### **5. Behavioral Feasibility:**

Behavioral Feasibility is the analysis of behavior of the candidate system in this we analyze that the candidate system is working properly or not. It working that it communicating proper with the environment or not. All these matters analyze and a good candidate system is prepared due to the change of system what is the change in behavior of the user, this factor is also analyzed. It includes how strong the reaction of staff will be towards the development of new system that involves computers use in their daily work.

#### **6. Legal Feasibility:**

This assessment investigates whether any aspect of the proposed project conflicts with legal requirements like zoning laws, data protection acts or social media laws. Let's say an organization wants to construct a new office building in a specific location. A feasibility study might reveal the organization's ideal location isn't zoned for that type of business. That organization has just saved considerable time and effort by learning that their project was not feasible right from the beginning.

# **PROJECT CATEGORY**

## **PROJECT CATEGORY**

A category of a project is website named “Bus transportation information system for Nagpur City”. A web pages are designed using HTML, CSS, JavaScript. Form a homepage various pages are linked containing different information. A web pages give a complete information to customer related bus routes and bus schedules.

## **PROGRAMMING LANGUAGE USED IN PROJECT: -**

### **Java Script**

- JavaScript was developed by Brendan Eich in 1995, which appeared in Netscape, a popular browser of that time. The language was later renamed JavaScript. There are many programmers who think that JavaScript and Java are the same. In fact, JavaScript and Java are very much unrelated. Java is very complex programming language whereas JavaScript is only a Scripting language. The syntax of JavaScript is mostly influenced by the programming language C.
- JavaScript is a very powerful client-side scripting language. JavaScript is used mainly for enhancing the interaction of a user with the webpage. In other words, you can make your webpage livelier and more interactive, with the help of JavaScript. JavaScript is also being used widely in game development and Mobile application development.

### **HTML: - HYPERTEXT MARKUP LANGUAGE**

- Hypertext Language (HTML) is the standard Markup Language for documents designed to be displayed in a web browser. It can be assisted by technologies such as Cascading Style Sheet (CSS) and scripting languages such as JavaScript.
- Web browser receive HTML documents from a web server or form local storage and render the documents into multimedia web pages. HTML describes the structure of a web page semantically and originally included cues for the appearance of the document.
- HTML elements are the building blocks of HTML pages. With HTML constructs, images and other objects such as interactive forms may be embedded into the rendered into the rendered page. HTML provides a means to create structural semantics for text such as headings, paragraphs, lists, links, quotes and other

items. HTML elements are delineated by tags, written using angle brackets. Tags such as <img/> and <input/> directly introduce content into the page. Other tags such as <p> surround and provide information about document text and may include other tags as the sub-elements. Browsers do not display the HTML tags, but use them to interpret the content of the page.

- HTML can be embedded programs written in a scripting language such as JavaScript, which affects the behavior and content of web pages. Inclusion of CSS defines the n look and layout of content.

## **CSS: - CASCODING STYLE SHEETS**

- Cascading Style Sheets (CSS) is style Sheet language used fir describing the presentation of a document written in a markup language like HTML CSS is a cornerstone technology of the World Wide Web, Algorithm HTML and JavaScript.
- CSS is designed to enable the separation of presentation and content, including layout, colors and fonts. This separation can improve content accessibility, provide more flexibility and control in the specification of presentation characteristics, enables multiple web pages to share formatting by specifying the relevant CSS in a separate CSS FILE AND REDUCE COMPEXCITY AND REPETITON IN THE STRUCTURAL CONTENT.
- Separation of Formatting and content also makes it feasible to present the same markup page in different styles for different rendering methods, such as on-screen, in print, by voice (via speech-based browser or screen reader), a Braille-based tactile devices.CSS also has rules for alternate formatting if the content is accessed on a mobile device. The name cascading comes from the specified priority scheme is predictable. A CSS Framework is a library allowing for easier, more standards-compliant web design using the Cascading Style Sheets Language. Most of these frameworks contain at least a grid. More Functional framework also come with come with more features and additional JavaScript. Based functionals, but are mostly design oriented and focused around interactive UI Pattens.

## TAGS

- **HTML TAG**

The very first thing is the doctype declaration of the document. In this case HTML5. You should always use this. The entire document is placed between the `<HTML>.... </HTML>`

- **HEAD TAG**

Marks the start of the part of the part of a HTML document called the head. This section is not visible on the webpage but it carries important information about the document.

- **TITLE TAG**

The page title can be seen in the browser window tab and when you bookmark the site in your favorites. You can put anything you want to in between in the title tags. We also see something new here too. The last tag `</title>`, means that the tag title now ends. You can end any tag by putting a backslash (`/`) after the less than sign.

- **BOBY TAG**

The `<body>` Element forms the main body of the HTML document. We can use `<BODY>` tag to specify background color and margin of text in HTML tag.

- **SCRIPT TAG**

The `<style>` tag is used to define style information on an HTML document. Inside the `<style>` element you specify how HTML element should render in a browser. Each HTML document can contain multiple `<style>` Tags.

- **LINE BREAK**

Line breaks are different than most of the tags we have seen so far. A line break ends the line you are currently on and resumes on the next line. Placing `<br/>` within the code is the same as pressing the return key in a word processor's the `<br/>` tag within the `<p>`(paragraph) tag.

- **HEADING TAG**

HTML defines six levels of headings. A heading element implies all the font changes, paragraph breaks before and after, and any white space necessary to render the heading. The heading elements are H1, H2, H3, H4, H5 and H6 with H1 being the highest (or most important) level and H6 the least.

- **FORM TAG**

The <form> tag in Html is used to create form for user input. There are many elements which are used within form tag. The HTML <form>tag is use for creating a form for user input.

A form contains text fields, checkboxes, radio-buttons and more. Forms are used to pass user-data to a specified URL.

- **TABLE TAG**

The HTML tables allow web authors to arrange data like text, images, links, other tables, etc. Into rows and column of cells. The HTML tables are created using the <table> Tag in which the <tr> tag is used to create table rows and <td>tag is used to create data cells. The elements under <td> are regular and left aligned by default.

**SOFTWARE AND HARDWARE  
REQUIREMENT SPECIFICATION**

- **HARDWARE: -**

Hardware is being is defined a under it contains how processor speed and how much RAM will be utilized for the better performance of the website.

- **RAM** :- **4GB**
- **HARDWARE** :- **500 GB OR More**
- **INPUT** :- **Keyboard and Mouse**

- **SOFTWARE: -**

Computer software, or simply software, is a collection of data or computer instructions that tell the computer how to work. This is in contrast to physical hardware, from which the system is built and actually perform the work.

- **Internet Explorer**
- **Google Chrome**
- **XAMPP**

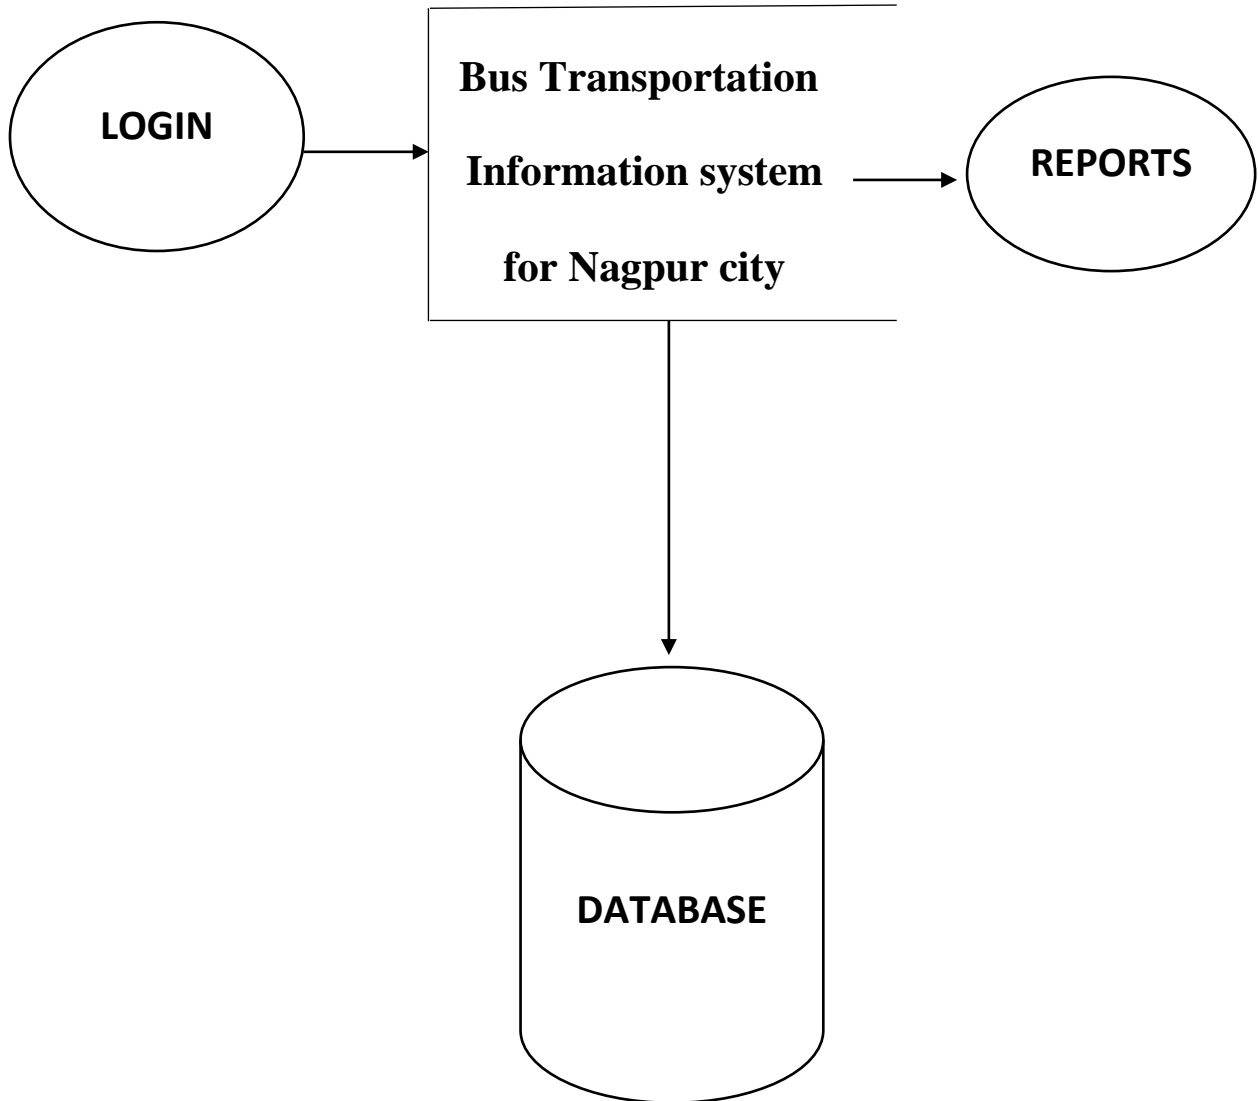

- **OPERATING SYSTEM: -**

- **Windows 7**
- **Windows 10**

```

<p>The Maharashtra State Road Transport Corporation is established by State Government of Maharashtra as per the provision in Section 3 of RTC Act 1950. The M.S.R.T.Corporation is operating it's services by the approved scheme of Road Transport Published vide Notification MVA 3173/30303-XIIA dated 29.11.1973 in the official gazette

</p>

</td>

<td>

<p>The area covered by the scheme is entire area of the State of Maharashtra. The undertaking is operating stage and contract carriage services in the entire area of the state of Maharashtra except S.T. undertaking defined under Section 68 A (b) of M. V. Act and other exception published in the scheme. The Present Maharashtra State Road Transport Corporation(M.S.R.T.C.) represents the confluence of three streams for providing passenger road transport in the public sector. These related to the Pre-1956 Reorganization states of Bombay, Madhya Pradesh and Hyderabad. However, in chronological sequence, the place of pride for providing public road transport services goes to the Hyderabad state.</p>

</td>

<td>

<p>First bus having been flagged off from the Pune to Ahmednagar in 1948. It's a story that had a hesitant beginning, with many people then not giving the State Transport (ST) bus service more than a couple of years of existence. Standing today by this milestone of 71 years, its position of strength speaks for itself - 18,449-odd buses, 1,02,000 employees, about 67 lakh citizens utilizing the service daily. Tracing the history that saw this development, we go back to the 1920s, when various entrepreneurs started their operations in the public transport scenario. Till the Motor Vehicle Act came into being in 1939, there were no regulations monitoring their activities, and this resulted in arbitrary competition, unregulated fares. The implementation of the act rectified matters to an extent. The individual operators were asked to form a union on defined routes in a particular area. This also proved to be beneficial for travelers as some sort of schedule set in, with a time table, pick-up points, conductors, and fixed ticket prices. Thus continued the state of affairs till 1948, when

then Bombay State Government, started its own state road transport service, called State Transport Bombay. And the first blue and silver-topped bus took off from

Pune to Ahmednagar.

The driver and conductor used to wear khaki uniforms and peak caps. There were 10 makes of buses in use then - Chevrolet, Ford, Bedford, Seddon, Studebaker, Morris Commercial, Albion, Leyland, Commer and Fiat. In the early 1950s, two luxury coaches were also introduced with Morris Commercial Chassis. These were called Neelkamal and Giriya Rohini and used to ply on the Pune-Mahabaleshwar route. They had two by two seats, curtains, interior decoration, a clock and green tinted glasses. In 1950, a Road Transport Corporation Act was passed by the Central Government and it delegated powers to states to form their individual road transport corporations with the Central Government contributing one-third of the capital. The Bombay State Road Transport Corporation (BSRTC) thus came into being, later changing its name to MSRTC with the re-organization

of the state.

The ST started with 30 Bedford buses having wooden bodies, coir seats and the fare charged on the Pune-Nagar route was nine paise. Having seen the ST undergo many changes, lists them off as- increasing the seating capacity from the original 30 to 45 to 54, introduction of all-steel bodies to replace wooden bodies to make them stronger and cushion seats for more comfort. Later, in 1960, aluminium bodies were introduced as steel corrodes, especially in coastal areas, and the colour code also changed to red from the blue and silver. A partial night service was launched in 1956; the overnight service about a decade later and the semi-luxury class came into being during the Asian Games in 1982. Significantly, the ST does not only carry people but also takes care of the postal mail, distribution of medicines, newspapers and even tiffins to children studying in the bigger towns. In rural areas, it aids farmers to transport their goods to the cities. All this in the face of bad roads, recurring losses, hiked taxes and yet it retains its identity of a transport service for everybody.

            <p>Nagpur is the divisional headquarters of the Maharashtra State Road Transport Corporation (MSRTC), and has one of the state's three bus workshops. The MSRTC has intercity and interstate routes, with two bus stations in Nagpur: Nagpur Bus Sthanak (CBS-1) at Ganeshpeth and Mor Bhawan (CBS-2) at Jhansi Rani Square, Sitabuldi. It operates 1,600 daily long- and short-distance routes from CBS-1 in Maharashtra and surrounding states, and 750 daily short-distance routes from CBS-2 in Vidarbha. Buses include semi-luxury 2+2 NEEM AARAAM, Parivartan 2+2, Asiad 2+2, and ordinary ST 2+3. Bus service is available to major cities in and around the state, including Bhopal, Indore, Jabalpur, Raipur, Chhindwara, Satna, Rewa, Raipur, Panna, Amravati, Raipur, Jagdalpur, Bilaspur, Mandla, Katni, Pune, Aurangabad, Jalna, Nashik, Mumbai, Nanded, Akola, Jalgaon, Bhusawal, Rajnandgaon, Parbhani and Gondia.

<hr>

<p class="card-text">NAGPUR: In a major boost to city’s public transport,  
Nagpur Municipal Corporation (NMC) is all set to procure 100 electric buses by Diwali  
2022. “The civic body will procure the buses with funds received from 15th Finance  
Commission,” municipal commissioner Radhakrishnan B told TOI.

NMC is also planning to procure a few double decker buses, which will  
ply on specific routes and especially take commuters to heritage sites across the city. It  
will join the city bus fleet sometime in 2023, he said.</p>

## Gallery Page:

The screenshot shows a web browser window displaying a gallery page for Nagpur Buses. The browser's address bar shows the URL: `C:/Users/LENOVO/Desktop/krutika/Bus_Transportation%20system/gallery.html`. The page has a green header with the text "MENTOR" on the left and navigation links: "Home", "About Us", "Routes", "Services", "Gallery", "Feedback", and a "Logout" button. Below the header is a green banner with the text "Nagpur Buses". The main content area features two columns of bus-related information. The left column has a small image of a bus stand and a text box titled "Nagpur Bus Stand" containing contact details for State Transport Bus Stand, including a contact number (712 2726221, 1800221250), address (Ganesh Peth, Nagpur - 440018), and website (www.msrtc.gov.in). The right column has a small image of an electric bus and a text box titled "Nagpur Electric Bus" containing news about the Nagpur Municipal Corporation (NMC) procuring 100 electric buses by Diwali 2022. At the bottom of the page, there is a copyright notice: "© Copyright Bus Transportation. All Rights Reserved" and social media icons for Twitter, Facebook, Instagram, and LinkedIn.

## Suggestion page:

The screenshot shows a web browser window displaying a suggestion form page. The browser's address bar shows the URL: `C:/Users/LENOVO/Desktop/krutika/Bus_Transportation%20system/suggestions.html`. The page has a green header with the text "BUS TRANSPORTATION SYSTEM" on the left and navigation links: "Home", "About Us", "Routes", "Services", "Gallery", "Feedback", and a "Logout" button. Below the header is a green banner with the text "Suggestions". The main content area features a form with the following fields: "Name:" (text input), "Email:" (text input), "Mobile\_No:" (text input), "Subject:" (text input), and "Message:" (text area). A blue "Submit" button is located at the bottom left of the form.

# Suggestion Database:

The screenshot shows the phpMyAdmin interface for a database named 'demo'. The 'suggestions' table is selected, and the following SQL query is displayed: `SELECT * FROM `suggestions``. The table contains 4 rows of data:

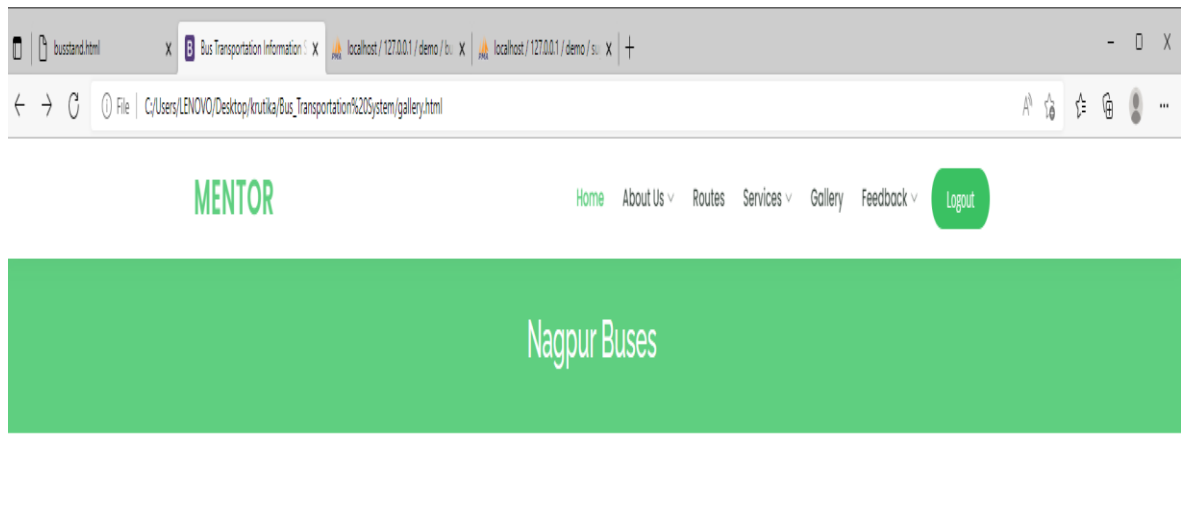

id	name	email	mobile_no	subject	message
1	Snehal	snehal@gmail.com	887664534	abc	xyz
2	Rishu	rishu@gmail.com	9022783280	xyz	ABC
3	purva	purva@gmail.com	1234567890	abc	xyz
4					

# Bus Contactlist Database:

The screenshot shows the phpMyAdmin interface for a database named 'demo'. The 'busstandcontactlist' table is selected, and the following SQL query is displayed: `SELECT * FROM `busstandcontactlist``. The table contains 14 rows of data:

id	busstandname	stdcode	telephone
0	XYZ	4343	3434
1	Nagpur 1	712	2729033
2	Nagpur 2	712	2726221
3	Katol	7112	222049
4	Rantak	7114	255122
5	Umred	716	242028
6	Saoner	7113	232244
7	Nagpur-Morhavan	712	2522334
8	Nagpur-Ravivagar	712	2554038

# **TESTING AND VALIDATION CHECKS**

## **Testing:**

Software testing must be planned carefully to void wastage of time and resources. Initially individual components are tested and debugged. After the individual components have been tested and added to the system integration testing take place. Once the full software product is completed, system testing is performed.

Software testing is a process of executing a program or application in the intent of finding the software bugs. It can also be stated as the process of validating and verifying that software program or application or product that meets the business and technical requirements the guided its's design and development.

Effective testing early in the process translates directly into long term cost saving from a reduced number of errors. The best program is worthless if it does not meet user needs.

### **TYPE OF TESTING:**

- **Unit Testing: -**

Testing of individual software component or modules is termed as Unit Testing. It is typically done by the programmer and not by testers, as it requires detailed knowledge of the internal program design and code. It may also require developing test driver modules or test harnesses.

- **Alpha Testing: -.**

It is the most common type of testing used in the Software industry. The objective of this testing is to identify all possible issues or defects before releasing it into the market or to the user. Alpha Testing is carried out at the end of the software development phase but before the Beta Testing. Still, minor design changes may be made as a result of such testing. Alpha Testing is conducted at the developer's site. In-house virtual user environment can be created for this type of testing.

- **Beta Testing: -**

Beta Testing is a formal type of Software Testing which is carried out by the customer. It is performed in the Real Environment before relating the product to the

market for the actual end-users. Beta Testing is carried out to ensure that there are no major failures in the software or product and it satisfies the business requirements from an end-user perspective. Beta Testing is successful when the customer accepts the software.

- **Regression Testing: -**

Testing an application as a whole for the modification in any module or functionality is termed as Regression Testing. It is difficult to cover all the system in Regression Testing, so typically Automation Testing Tools are used for these types of testing.

- **End-to-End Testing: -**

Similar to system testing, End-to-End Testing involves testing of a complete application environment in a situation that mimics real-world use, such as interacting with a database, using network communications, or interacting with other hardware, application, or systems if appropriate.

## **VALIDATION:**

- System Validation is a set of actions used to check the compliance of any element (a website element, a website, a document, a service, a task, a website requirement, etc.) with its purpose and functions.
- These actions are planned and carried out throughout the life cycle of the system. The validation process is performed in parallel with the system definition and system realization processes and applies to any activity and product resulting from this activity.
- The validation process is not limited to a phase at the end of website development, but generally occurs at the end of a set of life cycle tasks or activities, and always at the end of each milestone of a development project.
- Validation a generic term that needs to be instantiated within the context it occurs. When understood as a process, validation is a transverse activity to every life cycle stage of the website. Particularly during the development cycle of the website, the validation process is performed in parallel with the system definition and system realization processes and applies to any activity and product resulting from this activity.

# **SYSTEM SECURITY MEAURES**

## SECURITY MEASURES

- System security refer to the technical innovation and procedure applied to the hardware and operating system to product against deliberate or accidental damage from a defined thread.
- Data security is the protection of data from loss, disclosure, modification and destruction.
- Privacy defines the rights of the user or organization to determine what information they are willing to share with or access from others and how the organization can be protected against unwelcome, unfair, or excessive dissemination of information about it.
- The control is classified into three general categories: -
  - Database integrity through data validation techniques.
  - Control measure through password, encryption and Monitoring users on a regular basis.
  - Physical security from fire, flood, and other damage.

**IMPLEMENTATION, EVALUATION  
AND MAINTENANCE**

## **IMPLEMENTATION**

- Implementation is the carrying out, execution, or practice of a plan, a method, or any design, idea, model, specifications, standard or policy for doing something. As such, implementation is the action that must follow any preliminary thinking in order for something to actually happen.
- In an information Technology (IT) context, software or hardware implementation encompasses all the post-sale processes involved in something operating properly in its environment, including analyzing requirements, installation, configuration, customization, running, testing system integrations, user training, delivery and making necessary change. The word “deployment” is sometimes used to mean the same thing.
- This project will resolve all the problems related to the availability of buses easily. By implementation of this project a person will gather all information related to buses, he/she can also get exact information of buses in Nagpur City.

## **EVALUATION**

After the implementation stage another important stage is project development is evaluation. After keeping the project in the working condition for the some time, all the errors that are show in the computer program should be removed. The programmer needs to that are show in the computer program should be removed. The programmer needs to correct them so that the same errors should not be repeated. After evaluating the program and satisfying the needs of the user the program is maintained fully to give the same functionally for what is intended to be this stage should be implemented so as to regular check-up of errors with error/handling techniques. This stage is updating and correcting of the program to account for changing conditions or field experience. The evaluation process includes the study of the existing system there drawbacks and the various option to improve the system. The concentration should be on the satisfying the primary requirement of the user, the system is evaluated on the basis of:-

1. System availability
2. Compatibility
3. Correcting errors
4. Resolving necessary changes.
5. Specification changes
6. Enhance or modifying the system maintenance.

## **MAINTENANCE**

- When we talk about maintenance of the project, just we have to maintain the customer data base, the customer who is login and logout every moment is should be recorded in the database.
- Day to day up gradation is required because in daily life the new updates are comes in the bus system.
- Another maintenance is required for the feedback section. Because here we just only focuses on the customer satisfaction.
- The last maintenance is required for the user friendliness in the website. In these website we are maintained so many things, like to prevent from the bugs and viruses

# **FUTURE SCOPE**

## **Future scope of the Project**

- In our website “Bus Transportation System of Nagpur City”. We have covered all information of the Nagpur city.
- This website is user friendly and can easily access the information.
- It is a Flexible and can be modified over a period of time the advancement in technology.
- The Project or system website name is “Bus Transportation system for the Nagpur city so generally it will be a part of transpiration information f various public buses those using by the general public and adding images and clips of the buses.
- This website guides the person who want know more about the Nagpur Bus transportation.
- Our website is helpful for those users who want to gain knowledge as it I information website.
- Through this website the user can get the Bus Transportation Information about Nagpur City at home without taking a lot of time.

# **CONCLUSION**

## **CONCLUSION**

The conclusion of this project is that the website having the information about the Nagpur city buses. Also, we are providing the information related to Buses Timing, Routes, etc. All the information provided in this website is true. I have chosen this topic because I want to know more about Information of the Nagpur city buses and I want that you will also get required and desired information about the Nagpur buses. This website is useful for all age group people. This website is information and is useful for learning purpose. We have developed this website to give information about Nagpur City buses. Generally, this website is developed to make people knowledgeable. Bus transportation information system of Nagpur city. Through this website, so many information is to provide to make user a effective learner. In this, website we can get information of Nagpur city buses. Generally, this website is trying to increase the learning capacity of the user through e-learning and give them quality information in less time without visiting various places or link. We truly believe that person should move towards e-learning process and this website is taking one steps towards it. This website facilities various information about Nagpur city buses to save of user and make them an effective learner.

## **BIBLIOGRAPHY**

For the completion of this project, we have taken reference from book related to HTML, CSS and PHP. This helps us for successful completion of this project.

**The books and links are as follows:**

HTML Black Book
