INDEX

INTRODUCTION

INTRODUCTION

The term "medicinal plant" includes various types of plants used in herbalism ("herbology" or "herbal medicine"). It is the use of plants for medicinal purposes and the study of such uses. Plants have been used for medicinal purposes long before the prehistoric period. Ancient Unani manuscripts Egyptian papyrus and Chinese writings described the use of herbs. Evidence exists that Unani Hakims, Indian Vaids, and European and Mediterranean cultures were using herbs for over 4000 years as medicine.

Indigenous cultures such as Rome, Egypt, Iran, Africa, and America used herbs in their healing rituals, while other developed traditional medical systems such as Unani, Ayurveda, and Chinese Medicine in which herbal therapies were used systematically.

Recently, WHO (World Health Organization) estimated that 80 percent of people worldwide rely on herbal medicines for some aspect of their primary health care needs. According to WHO, around 21,000 plant species have the potential for being used as medicinal plants.

Treatment with medicinal plants is considered very safe as there is no or minimal side effects. These remedies are in sync with nature, which is the biggest advantage. The golden fact is that, use of herbal treatments is independent of any age group and the sexes. The ancient scholars only believed that herbs are only solutions to cure a number of health-related problems and diseases. They conducted a thorough study about the same, experimented to arrive at accurate conclusions about the efficacy of different herbs that have medicinal value. Most of the drugs, thus formulated, are free of side effects or reactions. This is the reason why herbal treatment is growing in popularity across the globe.

These herbs that have medicinal quality provide rational means for the treatment of many internal diseases, which are otherwise considered difficult to cure.

Medicinal plants such as Aloe, Tulsi, Neem, Turmeric, and Ginger cure several common ailments. These are considered as home remedies in many parts of the country. It is a known fact that lots of consumers are using Basil (Tulsi) for making medicines, black tea, in pooja and other activities in their day-to-day life.

Medicinal plants are considered as a rich resources of ingredients that can be used in drug development either pharmacopoeial, non-pharmacopoeial or synthetic drugs. Apart from that, these plants play a critical role in the development of human cultures around the whole world.

Moreover, some plants are considered an important source of nutrition and as a result of that they are recommended for their therapeutic values. Some of these plants include ginger, green tea, walnuts, aloe, pepper and turmeric etc. Some plants and their derivatives are considered as important sources for active ingredients which are used in aspirin and toothpaste etc.

Apart from the medicinal uses, herbs are also used in natural dye, pest control, food, perfume, tea, and so on. In many countries, different kinds of medicinal plants/ herbs are used to keep ants, flies, mice and flee away from homes and offices. Nowadays medicinal herbs are important sources for pharmaceutical manufacturing. please website contains different types of burps categories in filter option so that the customer can easily order their hopes from website and provide the good quality of herbs.

An online shop shop evoque the physical analogue of buying product or services at a regular retailer or hop shopping centre the process is called b2c business to consumer, online home shopping is a legal website from where the customer can order their herbs easily and made easy transaction and safe.

These online shopping provides checkout process where we just want to enter the address email phone number delivery options . internet is the only mode for the whole process of customer to find out a suitable herbs with better discount deals and please and order it is safe.

Home shoppe is a herbs ordering website from where we can search our herbs and order are herbs easily. aap shopee provide information about where it comes from how it is save its advantages its benefits and also has herbs delivery option from our web.

OBJECTIVES

OBJECTIVES

To spread awareness regarding herbal products are more safer and cheaper that the parmacuticals.

1. Herbs service and herbs product advertising

The main purpose of herbs website is to promote products which is good for our health and its services with the help of internet because this will rise the Indian economy and make this website more function in and famous as well as it will improve our self.

2. Selling a herbs product or a herbs service online
this is basically the main reason behind the existence of Hobbes online shopping website selling herbs product and health services is the most common objective you have to provide full and comprehensive information on what you sell allowing for prospective customers to easily order from the site as well as it will provide the detailed information about the the website from where we order your herbs.

3. Providing hubs product support and a customer service.
due to its worldwide nature the internet is a flexible structure allowing users to choose from thousands of similar herbs product they are just one click away what actually makes the difference between similar online businesses are the price and the customer support they provide communicating with prospective clients answering

their questions and offering all the necessary information they need.

4. Providing herbs information.

almost all the bake herbs website have a section featuring pertinent herbs company information for potential investors the information in this section usually refers to the herbs company, hobbs company official, different articles and editorials written about The herbs company along with the related images as well as contact information and link to personal profiles of herbs companies representatives charged with management, customer care, advertising, etc.

5. Establishing herbs brand awareness and identity.

Establishing herbs brand awareness or herbs company identity is an ongoing process with the purpose of herbs branding products with memorable names eye catching logos and maybe a slogan. in order to establish brand identity your website must address these elements in a unitary manner the product logon must reflect the design of your website in terms of graphics colours font size and sizes.

6. High reach ability

the main objective of our project is high rich ability in which we find that we can order our herbs easily from anywhere in the location at any time as well as The herbs item can read easily towards the customer.

7. High conversions

if people are coming on your web store and purchasing something then it will calculate as conversions and from the number of people who are buying stuff from your web app store we can calculate the conversion rate.

8. Customer satisfaction

customer is the main part of any E-Commerce business so it's very important to make your customer happy and satisfied by providing quality and desirable herbs product on time delivery 24/7 customer support and timely cell and best deal offers you can make your customer happy by selling your true products.

9. Social popularity

unless and until you are not famous and popular among people you cannot establish your herbs brand the key goal of social hubs website are to encourage more purchase via social and create more customers who are willing to back up your brand time and time again.

10. Increase revenue

the primary goal of any marketing strategy is ultimately to increase revolve, and Indian marketing is no exceptions.

Thankfully the internet provide plenty of opportunities to improve their bottom line there are dozens of way you can more sell online many of which you can implement right away some of these tips focus on specific strategies that you can implement.

This system helps to cure the users disease to the great extend and the user can order herbs online that will be good for his health.
Usually many market places don't keep it due to the minimum demand. So the online herbs shoppe with be a great platform for herbs to get easily available for the users.

Main objevtive of this project is to help people know how beautiful properties of herbs which are easily available in the nature .

Everyone have herbs at their home but they don't have proper knowledge of their uses and benefits so online shopee will help them to buy proper product with proper correct one.

PRILIMINARY SYSTEM ANALYSIS

PRILIMINARY INVESTIGATION

As we have seen maximum amount of people used herbs But only some people get right herbs and natural herbs which is good for health. But some get trap by fake sellers and they purchase the herbs which contain harmfull chemicals , which are grown through artificial way And which are not at all usefull.
Recently, WHO (World Health Organization) estimated that 80 percent of people worldwide rely on herbal medicines for some aspect of their primary health care needs. According to WHO, around 21,000 plant species have the potential for being used as medicinal plants
system analysis its not only time consuming but also a rogation task but it is crucial and most important phase for software development process preliminary investigation is the process of gathering data for requirement analysis it is more helpful for problem definition and requirement specification.

1. Understand the problem or opportunity.

In current competitive scenario in every herbs business establishment needs quality process to increase their efficiency as well as improve their productivity it is of vital importance that manual or time-consuming or monotonous operation are automatic so as to streamline the working of an organisation. Treatment with medicinal plants is considered very safe as there is no or minimal side effects. These remedies are in sync with nature, which is the biggest advantage. The golden fact is that, use of herbal treatments is independent of any age group and the sexes

SCOPE:-

This project has great future scope.

1.Help the user to save money :

The rising cost of prescription drugs have let the people to look for alternative while medicinal Herbs may not be as strong as fast acting as conventional medicine but can definitely cure health problems in a better way.

2. Easily available

This website will help the user to switch for herbal medicines over pharmaceuticals as it is more safer, easily available in our homes and nature and has more health benefits than Pharmaceuticals.
We will also provide the option of online shopping through which people can get herbs delivered at their home steps.

3.It will enhance gardening activities

After sharing everything about herbs we will also show how to grow many of them at home .This will not only promote greenery but will also help us to get fresh Herbs for our day to day consumption.

4. Helps user to choose the correct porduct :

Our project will help the user to find the correct product by providing the proper guide on how to choose the correct product through its colour, odour or the appearance. We will provide a complete detailed information regarding points to be focused while buying.

5. It will help the user to stay away from supplements

Rather than focusing on costly dietery supplements this website will help the user to get information about The Herbs which can be consumed in day to day life to maintain a better health.

PRESENT SYSTEM IN USE

In the existing system The herbs ordering process is the process and sometimes the website get hanged because of overuse of website.In present system the company registration facility is not well developed and sometimes we are not able to find the location of delivery person homes.in current scenario we find that in many of the website feedback is not well developed and most of the website are not focused on the feedback hence they are not implemented and grow fastly.

FLAWS IN PRESENT SYSTEM

There are different flaws in current system they are

Present system is not focuses on the customer feedback and hence they are not try to uplift their services and in many herbs ordering website they are not able to find the customer reaction in terms of emojis online herbs shopping is more or less like a intangible thing as we are dependent on the displayed pictures and description of The herbs product online payment leads to virtual pickpocketing many times.

Present system is not able to give the real-time information customer are not satisfied while ordering the herbs item. the main aim is to gain the trust of customers for herbs project which is totally natural and organic without any artificial method.So that they can take intake of herbs as by the physician order.

Need of New System

In the new system we introduce a emoji reaction to give feedback .And again we will take the initiative of uploading the original pictures of herbs the natural pictures of herbs so that the customer will get the satisfaction of the product he want.

This system provides the best security which made transaction secure and proper return policy is available in the new system within the 1 hour in this website the price of the herbs products is is less as compared to the other herbs website.

FEASIBILITY STUDY

After doing the project online shopping study and analysing all the existence or required functionalities of the system the next task is to do the feasibility study for the project.Feasibility study includes consideration of all possible ways to provide a solution to the given problem. The proposed solution should satisfy all the user requirements and should be flexible enough so that future changes can be easily done based on the future upcoming requirements.

1. Economical feasibility.

This is a very important aspects to be considered while developing a herbs ordering website. We decided the technology based on minimum possible cost factor.

* All hardware and software cost has to be Borne by the organisation.

2. Technical feasibility

Technically this website is visible in nature because in all over environment the internet access facilities get well developed these also include the study of function performance and constraints that may affect the ability to achieve an acceptable system for this feasibility study we studied complete functionality to be provided in the system as described in the system requirement specification and checked if everything was possible using different type of fronted and backend platforms.

3. Operational feasibility

No doubt the proposed system is fully g u i based that is very user friendly and all inputs to be taken all self explanatory even to the lyman .besides a proper training has been conducted to let know the essence of the system to the user so that they feel comfortable with the new system as far our study is concerned the client are comfortable and happy as this system has cut down their loads and doing it refers to the measure of solving problems with the help of new proposed system**.**

4. Social feasibility

Social feasibility is a determine of either a proposed project with will be acceptable to the people or not this determination typically examine the probability of the project acceptance by the group directly affected by the proposed system change it describe the effect on user from the introduction of the new system considering whether there will be no need for retaining the workforce**.**

5. Behavioural feasibility.

Behavioural visibility is the analysis of behaviour of the candidate system in this we analyse that the candidate system is working properly or not if working that it communicating proper with the environment or not all these matters are analyse and a good candidate system is prepared due to the change of system what is the change in behaviour of the users this factors are also analysed it includes how strong the reaction of staff will be towards the development of the new system that involves computers used in Daily life.

6. Legal feasibility

This assessment investigation whether any aspects of the proposed project conflict with legal requirement like zoning laws data protection acts or social media laws let se an organisation wants to construct a new office building in the specific location of feasibility study might reveal the organisation's ideal location is an zone for the type of business that organisation has just saved considerable time and effort by learning that their project was not feasible right from the beginning.

* overall we have estimated that the benefits of the organisation is going to receive from the proposed system will surely overcome the initial cost and the latter on running cost for system.

PROJECT CATEGORY

This category of the project that is " HERBS ONLINE SHOPEE" is a web application. Web application means a set of web pages in which first web page is a home page that is containing all kinds of other pages. Kit is a set of number of web pages design to provide complete information about the service provided by our website for the customer. CASCADING STYLING SHEETS AND HYPER TEXT MARKUP LANGUAGE(HTML) , BOOTSTRAP.

Bootstrap uses HTML elements and CSS properties that require the HTML5 doctype . Always include the HTML5 doctype at the beginning of the page, along with the lang attribute and the correct character set:

 • Text Markup Language (HTML) is a collection of style used to create a document for the World Wide Web(WWW), popularly know as the Web. 17

 • You can also create hypertext link,also know as hyperlink, to the other documents or a portion of the other Web pages.Many companies publicize their products in web page by using HTML. The internet is an international network of computers that exchange information with each other.

Cascading Style Sheet (CSS) is used to set the style in web pages that contain HTML elements. It sets the background color, font-size, font-family, color, … etc property of elements on a web page. There are three types of CSS which are given below:

- Inline CSS
- Internal or Embedded CSS
- External CSS

• Hyper text markup language is used for designing different web pages and if appearance. Due of HTML tags different special effect of text,pictures,animation effect,color,effect, text size, font styles etc. can define to make more attractive web page. To understand different web page construction strategies adopted for attractive web page. To understand different web page construction strategies adopted for attractive web page representation, we can observe HTML codes or store while browsing the web page. Most of the web pages in different website are build up with HTML code.

• HTML, document consist of different instruction each Instruction is called as "Element" for building the web are used all HTML tags. It provide a means to create structured document by using text such as heading,paragraph,lists etc.

 • The appearance of Web page is important, and html, provides style to make the document look attractive. You can use graphics,fonts,size, and colors to enhance the presentation of a document.

• Hypertext Markup Language(HTML) is the standard markup language for creating web pages and web application. With cascading style sheets (css) and JavaScript it forms a triad of cornerstone technologies for the World Wide Web.Web browser receive HTML documents from a Web server or form local storage and render them into multimedia webpages.

• HTML describes the structure of a web page semantically and originally included cues for the document.HTML elements are the building blocks of HTML pages. 18 With HTML images and other objects, such as interactive forms, may be embedded into the rendered page. BASIC STRUCTURE OF THE WEBSITE PHP is a server side scripting language. That is used to develop static websites or dynamic websites or web applications, PHP stands for hypertext pre-processor,that earlier stood for personal home page. PHP script can only be interpreted on a server that has PHP installed. The client computers accessing the PHP scripts file contains PI-1P tags and ends with the extension".php".

A file can also contain tags such as HTML and client side scripts such as JavaScript. HTML is an added advantage when learning PHP language, you can even learn PHP language. You can even learnPHP without knowing HTML but its recommended you at least know the basics of HTML. :-

The tag identifies the document as an HTML document. This tag is super flours after the tag, but it is necessary for older browser that do not support the tag. It is also helpful to the people who read the HTML code. The tag contain information about the document including its title, script, used,style, definition and document description. Not all browser require this tag but most browser expect to find any available additional information about the document within
tag.

Additionally , the contains other tag that has information for search engines and indexing program. 19 .

The encloses all tags, attributes and information that you want visitor's browser to display almost everything else in This entire hook takes place between the
tag.

 TAGS: . When css parses a file, it looksfor opening and closing tags, which arewhich tell to start and stop interpreting the code between them, if a file contain only code,it is preferable to omit the html code,it is preferable to omit the PHP closing tag at the end of the file. HTML TAG: This is the first tag is every HTML document. This tag indicates that the content of the file is in HTML language. The entire document is place between the . Starts and end tags, HEAD TAG:

SOFTWARE & HARDWARE SPECIFICATION

SOFTWARE:

Software is defined as under it contain in which Operating System and on which web browser has supported for the performance of the website.

Browser: (Internet Explorer, Google Chrome)
Text Editor : (Notepad , Atom)

OPERATING SYSTEM: Windows 7, Windows 10

HARDWARE:

Hardware is being defined as under it contain how processor speed and how much
RAM will be used for the better performance of the website.

Installed RAM: 4.00 GB (3.88 GB usable)
Hard Disk: 1TB
Processor: Intel(R) Core(TM) i3-6006U CPU @ 2.00GHz 1.99 GHz
Input: Keyboard and Mouse
System Type: 64-bit operating system, x64-based processor **.**

TESTING AND VALIDATION CHECK :

1) Acceptance Testing :

Acceptance Test is performed by the client and verifies that the system is full fill the business requirements and as it is as per the needs of the end-user. Client accepts these website because all the features and functionalities work as expected.
It is the last phase of the testing, after which the website goes into production. This is also called User Acceptance Testing (UAT).

2) Accessibility Testing :

Accessibility Testing is determine that the website is accessible via through internet.Here, disability means deaf, color blind, mentally disabled, blind, old age and other disabled groups. Various checks are performed such as font size for visually disabled, color and contrast for color blindness, etc.

3) Beta Testing :

Beta Testing is a formal type of website Testing which is carried out by the customer. It is performed in the Real Environment before releasing the website to the market for the actual end-users. Beta Testing is carried out to ensure that there are no major failures in the software or food product and it satisfies the food business requirements from an end-user perspective.

4) **Back-end Testing** :

Whenever an input or data is entered on front-end webpage, it stores in the database and the testing of such database is known as Database Testing or Backend 106 Testing.There are different databases like SQL Server, MySQL, and Oracle, etc. Database Testing involves testing of table structure, schema, stored procedure, data structure and so on.

5) **Browser Compatibility Testing :**

It is a subtype of Compatibility Testing (which is explained below) and is performed by the testing team.Browser Compatibility Testing is performed for web applications and it ensures that the software can run with the combination of different browser and operating system. This type of testing also validates whether web application runs on all versions of all browsers or not. And these website is compatible with any browser.

6) **Compatibility Testing :**

It is a testing type in which it validates how software behaves and runs
in a different environment, web servers, hardware, and network environment.Compatibility testing ensures that web application can run on a different configuration, different database, different browsers, and their versions. Compatibility testing is performed by the testing team.

7) Component Testing :

It is mostly performed by developers after the completion of unit testing. Component Testing involves testing of multiple functionalities as a single code and its objective is to identify if any defect exists after connecting those multiple functionalities with each other.

SYSTEM SECURITY MEASURES :

We take security seriously at Online Herbs Shoppe. If you are a security researcher or expert, and believe you've identified security-related issues with Online Herbs Shoppe website , we would appreciate you disclosing it to us responsibly. Our team is committed to addressing all security issues in a responsible and timely manner, and ask the security community to give us the opportunity to do so before disclosing them publicly.

 Please submit a bug to us on our Online Herbs Shoppe feedback page, along with a detailed description of the issue and steps to reproduce it, if any. We trust the security community to make every effort to protect our users data and privacy. Online Herbs Shoppe provide the security of data hiding where the customer details are hide from others.

Online Herbs Shoppe mainly focuses on the security while making any payment online and make transaction securely. We regret any disruption this may cause and appreciate your immediate attention to this information. If you have queries/concerns, please do not hesitate to contact us , we'll reach out to you right away.

IMPLEMENTATION , EVALUATION AND MAINTENANCE

IMPLEMENTATION:

In current system we find more bugs and errors , so these bugs and errors get solved in new system .Here we made new system which generally focuses on the customer satisfaction, security and profile. Here we also implement the feedback option , so we can easily find out the customer emotion and satisfaction , generally Online Herbs Shoppe focuses on the customer feedback.

EVALUATION :

Online herbs delivery services rely on urban transportation to alleviate customers' burden of travelling in highly dense cities. As new business models, these services exploit user-generated contents to promote collaborative consumption among its members. This study aims to evaluate the impact of traffic conditions (through the use of Google Maps API) on key performance indicators of online herb delivery services .

MAINTENANCE :

In day to day basis and according to the market value and demand, We have to maintained our website in terms of order and money value.Day to Day transaction between the customer and the website will be maintain and successfully.Maintenance is necessary because to make the market we have to attract the customer with the help of daily offer and discount so that the marketing will grow and GDP growth will also increase. Day to day made implementation is necessary according to the user requirement , these implementation make the website well maintained and market suitable and also generate employment.

FUTURE SCOPE OF PROJECT :

Currently our project Online Herbs Shoppe is a shopping website where user can get some information and can also buy those herbs online. By default the payment mode for buying is the net banking option. In future we will be adding the cash on delivery option for our website to be more user friendly .

In near future we will be also providing recepies of all the herbs (which will help user to get knowledge regarding how to use a particular herb) , and we will also provide recepie for every particular disease which will help the user to find solution for their diseases.

We will also implement all the suggestions and the feedbacks which we will be receving at our website. Our main aim is to help people get cured from the natural herbs easily.

This website will help the user to switch for herbal medicines over pharmaceuticals as it is more safer , easily available in our homes and nature and has more health benefits than pharmaceuticals.

CONCLUSION :

In Online Herbs Shoppe lot of features are incorporated and the main beneficiaries is many of the customers will deal with different varieties of herbs. Moreover extra features can be identified and incorporated in future.In order to accommodation additional features it will take longer time and effort to understand the requirement and converting it into computerized system.

Online shopping become more enjoyable and easier than the real world shopping. It is one of the application to improve the marketing of the company food product.My website which totally reduce paper work which is indirectly a step towards cash economy.

The knowledge gained while developing website will not just help me out in upcoming exams but in the near future as well.
