PREFACE

I am profoundly pleased to present this book on Indian Economics - I (B.Com. Semester-V). Though it covers the new CBCS syllabus of RTM Nagpur University, Nagpur, however, I am sure that it will also be of great help to the students of other universities.

The book attempts to explicate and document the theoretical aspects of the Indian Economy.

The book is divided into four parts :

Unit - I of the book deals with the progress of the Indian Economy under the Five Year Plans.

Unit - II of the book deals with the features of Indian Economy, policy concept of economic growth & economic development and availability of natural resources.

Unit - III of the book deals with the problems of population explosion and unemployment.

Unit - IV deals with various concepts of Public Finance related to the Indian Economy like public expenditure, public revenue, public debts and fiscal deficit.

I have referred to a number of standard books, government publications, speeches, articles, journals, bulletins and all that has been well said or written on the subject to make the book up to date and give a wide coverage.

I welcome constructive suggestions. With a belief of amicability and friendliness of the book towards the students of the subject, I present this book.

15th July, 2018
